

EA identified and evaluated three alternatives for managing the Refuges for the next 15 years. Under Alternative A, the No Action alternative, the Service would manage habitats, wildlife, programs, and facilities at current levels as time, staff, and funds allow. Refuge habitats would continue to be managed on a minimal basis and opportunistic schedule that may maintain, or most likely would result in decline in, the diversity of vegetation and water quality and quantity in the wetlands. The Service would not develop any new management, restoration, or education programs at the Refuges.

Alternative B, the Proposed Action, would increase management activities on the Refuges. Upland habitats would be evaluated and managed for the benefit of migratory bird species. Monitoring and management of invasive species on the Refuges would be increased. With additional staffing, the Service would collect in-depth baseline data for wildlife and habitats. Efforts would be increased in the operations and maintenance of natural resources on the Refuges and to maintain and develop partnerships that promote wildlife and habitat research and management. An emphasis on adaptive management, including monitoring the effects of habitat management practices and use of the research results to direct ongoing management, would be a priority.

Under alternative C, Refuge staff would rely on partnerships to achieve Refuge goals and objectives. Refuge management activities would be increased and enhanced through the use of partnerships. Refuge staff would strive to accomplish Refuge work through partnerships with others. An emphasis on adaptive management, including monitoring the effects of habitat management practices and use of the research results to direct ongoing management, would be a priority.

The Service is furnishing this Notice to advise other agencies and the public of the availability of the Final Plan, to provide information on the desired conditions for the Refuges, and to detail how the Service will implement management strategies. Based on the review and evaluation of the information contained in the EA, the Regional Director has determined that implementation of the Final Plan does not constitute a major Federal action that would significantly affect the quality of the human environment within the meaning of Section 102(2)(c) of the National Environmental Policy Act. Therefore, an Environmental Impact Statement will not be prepared.
