k. This application has been accepted and is now ready for environmental analysis.

The Council on Environmental Quality (CEQ) issued a final rule on April 20, 2022, revising the regulations under 40 CFR parts 1502, 1507, and 1508 that federal agencies use to implement the National Environmental Policy Act (NEPA) (see National Environmental Policy Act Implementing Regulations Revisions, 87 FR 23,453-70). The final rule became effective on May 20, 2022. Commission staff intends to conduct its NEPA review in accordance with CEQ's new regulations.

l. The project consists of: (1) a stone masonry dam, 88 feet long and 63 feet high; (2) a 110-foot-long section of rock ledge adjacent to the dam with 2.5-foot-high pipe-supported flashboards; (3) a reservoir with a surface area of 4.8 acres at the normal water surface elevation of

350 feet;¹ (4) a 110-foot-wide, 150-foot-long intake structure with a 41-foot-wide by 14-foot-high trash rack opening and fitted with a trash rack with 1-inch clear bar spacing; (5) a divided, 45-foot-long, reinforced concrete penstock, where the Unit 1 penstock is 18 feet wide by 12 feet high and the Unit 2 penstock is 10 feet wide by 12 feet high; (6) a powerhouse, approximately 34 feet wide and 26 feet long, containing two turbine-generator units of 1.5 megawatts (Unit 1) and 0.6 megawatt (Unit 2); (7) a substation, 51 feet wide and 88 feet long; (8) a 745-foot-long, 5-kilovolt (kV) buried generator lead and a 700-foot-long, 46-kV buried transmission line; and (9) appurtenant facilities.

Alice Falls Hydro currently operates the project in a run-of-river mode and releases a year-round minimum flow over the spillway of 25 cubic feet per second (cfs) for the protection of aquatic resources and a 125-cfs minimum flow from May 20 to September 8 for the enhancement of aesthetic resources. A 20-cfs conveyance flow is released through the fish bypass facility from April 1 through November 30.

Alice Falls Hydro proposes to continue to operate the project in a run-of-river mode and provide a year-round, continuous minimum flow of 25 cfs; however, it would discontinue providing a 125-cfs aesthetic flow. Alice Falls Hydro would also shorten the duration of the operation of the fish bypass facility and temporarily increase conveyance flows, providing 42 cfs, or inflow, whichever is less, from April 15 through May 31 and 20 cfs or inflow, whichever is less, from June 1 through November 15.
