SUPPLEMENTARY INFORMATION:

Title: Continuous Release Reporting Regulation (CRRR) under the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA), OMB Control No. 2050-0086, EPA ICR Number 1445.05, expiring September 30, 2001. This is a request for extension of a currently approved collection.

Abstract: Section 103(a) of CERCLA, as amended, requires the person in charge of a facility to immediately notify the National Response Center (NRC) of a hazardous substance release into the environment if the amount of the release equals or exceeds the substance's reportable quantity (RQ). The RQ of every hazardous substance can be found in Table 302.4 of 40 CFR 302.4. Section 103(f)(2) of CERCLA provides facilities relief from this per-occurrence notification requirement if the hazardous substance release at or above the RQ is continuous and stable in quantity and rate. Under the CRRR, to report such a release as a continuous release you must make an initial telephone call to the NRC, an initial written report to the EPA Region, and if the source and chemical composition of the continuous release does not change and the level of the continuous release does not significantly increase, a follow-

up written report to the EPA Region one year after submission of the initial written report. If the source or chemical composition of the previously reported continuous release changes, notifying the NRC and EPA Region of a change in the source or composition of the release is required. Further, a significant increase in the level of the previously reported continuous release must be reported immediately to the NRC according to section 103(a) of CERCLA. Finally, any change in information submitted in support of a continuous release notification must be reported to the EPA Region. The continuous release of hazardous substance information collected under CERCLA section 103(f)(2) is also available to EPA program offices and other Federal agencies who use the information to evaluate the potential need for additional regulations, new permitting requirements for specific substances or sources, or improved emergency response planning. State and local government authorities and facilities subject to the CRRR use release information for purposes of local emergency response planning. Members of the public, who have access to release information through the Freedom of Information Act, may request release information for purposes of maintaining an awareness of what types of releases are occurring in different localities and what actions, if any, are being taken to protect public health and welfare and the environment. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR Chapter 15. The **Federal Register** document required under 5 CFR 1320.8(d), soliciting comments on this collection of information was published on March 28, 2001 (66 FR 16910). One question was received through electronic mail; no additional comments were received.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 92 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal Agency. This includes the time needed to review instructions; develop acquire, install, and use technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing

and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities:

Entities potentially affected by this action are facilities that manufacture, process, or otherwise use certain specified hazardous substances.

Estimated Number of Respondents: 2,712.

Frequency of Response: Annual.

Estimated Total Annual Hour Burden: 249,451.

Estimated Total Annualized Capital, O&M Cost Burden: \$76,496.

Send comments on the Agency's need for this information, the accuracy of the provided burden estimates, and any suggested methods for minimizing respondent burden, including through the use of automated collection techniques to the addresses listed above. Please refer to EPA ICR No. 1445.05 and OMB Control No. 2050-0086 in any correspondence.

Dated: September 12, 2001.

SUPPLEMENTARY INFORMATION:

Title: Identification, Listing and Rulemaking Petitions (OMB Control No. 2050-0053; EPA ICR No. 1189.09) expiring September 30, 2001. This is a request for extension of a currently approved collection.

Abstract: This ICR provides a discussion of all the information collection requirements associated with developing and reviewing rulemaking petitions, solid waste and boiler variances, hazardous waste exclusions, and hazardous waste listing exemptions under 40 CFR parts 260 and 261. It includes a detailed description of data items and respondent activities associated with each activity. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR Chapter 15. The **Federal Register** document required under 5 CFR 1320.8(d), soliciting comments on this collection of information was published on April 3, 2001 (66 FR 17702); no comments were submitted.

Burden Statement: The annual public reporting and record keeping burden for this collection of information varies depending on the type of petition or demonstration. For example, it is estimated that the average reporting burden per respondent ranges from less than 1 hour (equipment cleaning and replacement) to 748 hours (preparation of a delisting petition). The average recordkeeping burden per respondent

ranges from 63 hours (equipment cleaning and replacement) to 2 hours (delisting petition). Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Business or other for Profit Institutions.

Estimated Number of Respondents: 126.

Frequency of Response: On occasion.
Estimated Total Annual Hour Burden: 20,802 hours.

Estimated Total Annualized Capital, O&M Cost Burden: \$886,315.

Send comments on the Agency's need for this information, the accuracy of the provided burden estimates, and any suggested methods for minimizing respondent burden, including through the use of automated collection techniques to the addresses listed above. Please refer to EPA ICR No. 1189.09 and OMB Control No. 2050-0053 in any correspondence.

Dated: September 18, 2001.

SUPPLEMENTARY INFORMATION:

Title: NSPS Asphalt Processing and Asphalt Roofing Manufacture; OMB Control Number 2060-0002; EPA ICR No. 0661.07, expiring September 30, 2001. This is a request for extension of a currently approved collection.

Abstract: This ICR contains recordkeeping and reporting requirements that are mandatory for compliance with 40 CFR Part 60, New Source Performance Standards (NSPS), Subpart UU. The respondents of the recordkeeping and reporting requirements are asphalt processing and roofing manufacturers (SIC Codes 2911, 2951, and 2952) which commenced construction, modification, or reconstruction after November 18, 1980, or May 26, 1981 as appropriate. The control of emissions of particulate matter from asphalt processing and asphalt roof manufacturing requires not only the installation of properly designed equipment, but also the operation and maintenance of that equipment. Particulate matter emissions from asphalt processing and asphalt roof manufacturing are the result of materials handling, fuel combustion, and storage. These standards rely on the reduction of particulate matter emissions by pollution control devices such as electrostatic precipitators, high velocity
