

not effectively regulate GHG emissions, which are contributing to global climate change and associated modifications to ringed seal habitat (77 FR 76712; December 28, 2012). In the final listing rule, we expressly acknowledged in response to comments on our assessment of existing regulatory mechanisms in the proposed listing determination that there is some progress addressing anthropogenic GHG emissions (77 FR 76734; December 28, 2012). As such, we conclude that the petition does not present substantial new information or new analysis of the information considered in the final listing rule regarding this ESA section 4(a)(1) factor.

Factor E: Other Natural or Manmade Factors Affecting Its Continued Existence

We concluded in the final listing rule that the threats posed by pollutants, oil and gas activities, fisheries, and shipping do not individually or collectively place Arctic ringed seals at risk of becoming endangered in the foreseeable future. We recognized, however, that the significance of these threats would likely increase for populations diminished by the effects of climate change or other threats (77 FR 76714; December 28, 2012). The petition asserts that there is no information indicating that any of these factors constitute a threat to this species. Related to this, the petition notes that in 2017, nine countries and the European Union agreed not to conduct commercial fishing in the Central Arctic Ocean for at least the next 16 years. We are aware of this agreement, and note that the United States made a similar commitment in 2009 (prior to issuance of the final listing rule) and prohibited commercial fishing in the Arctic portion of the U.S. Exclusive Economic Zone. Thus, we do not believe this represents substantial new information regarding this ESA section 4(a)(1) factor.

Petition Finding

We thoroughly reviewed the information presented in the petition, and found that this information largely reiterates previous arguments expressed in comments received regarding the proposed listing determination for the Arctic ringed seal that were addressed in the final listing rule. The petition does not present substantial new information or new analysis indicating that the scientific and commercial data considered in our listing determination, or the analytic methodology used in the determination, were in error. Therefore, we find that the petition does not present substantial scientific or

commercial information indicating that the petitioned action may be warranted. Nevertheless, as stated above, we are separately initiating a review of the status of the Arctic ringed seal pursuant to 16 U.S.C. 1533(c)(2), including whether the best scientific and commercial data available indicate delisting is warranted.

Fisheries of the Gulf of Mexico; Southeast Data, Assessment, and Review (SEDAR); Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of SEDAR 72 Pre-workshop Webinar for Gulf of Mexico gag grouper.

SUMMARY: The SEDAR 72 assessment of Gulf of Mexico gag grouper will consist of a series of data and assessment webinars. See **SUPPLEMENTARY INFORMATION**.

DATES: The SEDAR 72 Pre-workshop Webinar will be on December 15, 2020, from 2 p.m. to 4 p.m., Eastern.

ADDRESSES: The meeting will be held via webinar. The webinar is open to members of the public. Those interested in participating should contact Julie A. Neer at SEDAR (see **FOR FURTHER INFORMATION CONTACT**) to request an invitation providing webinar access information. Please request webinar invitations at least 24 hours in advance of each webinar.

SEDAR address: 4055 Faber Place Drive, Suite 201, North Charleston, SC 29405.

FOR FURTHER INFORMATION CONTACT: Julie A. Neer, SEDAR Coordinator; (843) 571–4366; email: Julie.neer@safmc.net

SUPPLEMENTARY INFORMATION: The Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils, in conjunction with NOAA Fisheries and the Atlantic and Gulf States Marine Fisheries Commissions have implemented the Southeast Data, Assessment and Review (SEDAR) process, a multi-step method for determining the status of fish stocks in the Southeast Region. SEDAR is a multi-step process including: (1) Data Workshop; (2) Assessment Process utilizing webinars; and (3) Review Workshop. The product of the Data Workshop is a data report that compiles and evaluates potential datasets and recommends which datasets are appropriate for assessment analyses. The product of the Assessment Process is a stock assessment report that describes the fisheries, evaluates the status of the stock, estimates biological benchmarks, projects future population conditions, and recommends research and monitoring needs. The assessment is independently peer reviewed at the Review Workshop. The product of the Review Workshop is a Summary documenting panel opinions regarding the strengths and weaknesses of the stock assessment and input data. Participants for SEDAR Workshops are appointed by the Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils and NOAA Fisheries Southeast Regional Office, HMS Management Division, and Southeast Fisheries Science Center. Participants include data collectors and database managers; stock assessment scientists, biologists, and researchers; constituency representatives including fishermen, environmentalists, and NGO's; International experts; and staff of Councils, Commissions, and state and federal agencies.

The items of discussion in the Pre-workshop Webinar is as follows:

Panelists will review the data sets available for the assessment and discuss initial modeling efforts.

Although non-emergency issues not contained in this agenda may come before this group for discussion, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically identified in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been

notified of the intent to take final action to address the emergency.

Special Accommodations

The meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to the Council office (see **ADDRESSES**) at least 5 business days prior to each workshop.

Note: The times and sequence specified in this agenda are subject to change.

South Atlantic Fishery Management Council (Council); Public Meetings

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of Gulf of Mexico Fishery Management Council (GMFMC) and South Atlantic Fishery Management Council (SAFMC) informational webinars.

SUMMARY: The GMFMC and SAFMC will host informational webinars on behalf of NOAA Fisheries regarding the implementation of the Southeast For-Hire Electronic Reporting Program.

DATES: The GMFMC will host two For-Hire Electronic Reporting informational webinars on December 15, 2020, from 10 a.m. until 12 p.m. and from 6 p.m. until 8 p.m. The SAFMC will host two For-Hire Electronic Reporting informational webinars on December 16, 2020, from 10 a.m. until 12 p.m. and from 6 p.m. to 8 p.m.

ADDRESSES: The meetings will be held via webinar.

FOR FURTHER INFORMATION CONTACT: Cameron Rhodes, Outreach Program Manager, SAFMC; phone: (843) 571-4366 or toll free: (866) SAFMC-10; fax: (843) 769-4520; email: Cameron.rhodes@safmc.net.

SUPPLEMENTARY INFORMATION: The GMFMC and SAFMC on behalf of NOAA Fisheries will each host informational webinars regarding the upcoming implementation of the

Southeast For-Hire Electronic Reporting Program. Requirements for South Atlantic federal permit holders become effective January 4, 2020 and requirements for Gulf of Mexico federal permit holders become effective January 5, 2020. The informational webinars will provide hands-on training from staff with the Southeast For-Hire Electronic Reporting Program and provide opportunities for participants to ask questions about the program and approved software.

The webinars are open to the public. Registration is required. Additional information, including links to registration for each informational webinar is available at: <https://www.fisheries.noaa.gov/southeast/southeast-electronic-reporting-technologies>.

Special Accommodations

The meetings are physically accessible to people with disabilities. Requests for auxiliary aids should be directed to the Council office (see **ADDRESSES**) 5 days prior to the meeting.

Note: The end times specified for these webinars are subject to change.

National Oceanic and Atmospheric Administration

[RTID 0648-XA640]

Pacific Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public workshops.

SUMMARY: The Pacific Fishery Management Council's (Council) is conducting four online workshops as part of its Fishery Ecosystem Plan Climate and Communities Initiative. Each workshop will have a regional focus (see Supplementary Information).

DATES: The online workshops will begin at 9 a.m. Pacific Standard Time and continue each day until the conclusion of business for the day. The online workshops will occur on the following days:

- *Southern California region:* Wednesday–Thursday, December 16–17, 2020
- *Northern California region:* Wednesday–Thursday, January 13–14, 2021
- *Washington region:* Wednesday–Thursday, January 20–21, 2021
- *Oregon region:* Tuesday–Wednesday, February 2–3, 2021

ADDRESSES: These workshops will be held online. Specific meeting information, including directions on how to join the workshops and system requirements will be provided in the meeting announcement on the Pacific Council's website (see www.pcouncil.org). You may send an email to Mr. Kris Kleinschmidt (kris.kleinschmidt@noaa.gov) or contact him at (503) 820-2280, extension 412 for technical assistance.

Council address: Pacific Fishery Management Council, 7700 NE Ambassador Place, Suite 101, Portland, OR 97220-1384.

FOR FURTHER INFORMATION CONTACT: Kit Dahl, Staff Officer, Pacific Council; telephone: (503) 820-2422.

SUPPLEMENTARY INFORMATION: The Council is conducting a climate change scenario planning exercise as part of its Fishery Ecosystem Plan Climate and Communities Initiative. The workshops will be open to the public. As part of this exercise, four climate change scenarios were developed in January 2020. Based on these four scenarios, workshop participants will identify specific challenges that could be faced by West Coast fishing communities, regions, and participants. These challenges will then be used to formulate potential solutions and actions that the Council and other stakeholders could take to respond to the effects of climate change in the California Current Ecosystem. The results of these workshops are tentatively scheduled to be reported to the Council in March 2021. Participants will be invited to each workshop, representing a range of West Coast fishery stakeholders within each region.

Although non-emergency issues not contained in the meeting agenda may be discussed, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically listed in this document and any issues arising after publication of this document that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the intent to take final action to address the emergency.
