

universe of valid mental health organizations to be sampled in Phase II. The inventory will collect basic information regarding the name and address of the organizations, their type and ownership, size measures (e.g., number of staff), and the kinds of services provided.

Phase II will sample approximately 2,000 mental health organizations and utilize a more detailed survey instrument. Although the Sample

Survey form will be more comprehensive, it will be very similar to surveys and inventories fielded in 2000 and earlier. The organizational data to be collected by the Sample Survey form include university affiliation, client/patient census by basic demographics, revenues, expenditures, and staffing.

The resulting data base will be used to provide national estimates and will be the basis of the National Directory of Mental Health Services. In addition,

data derived from the survey will be published by CMHS in *Data Highlights*, in *Mental Health, United States*, and in professional journals such as *Psychiatric Services* and the *American Journal of Psychiatry*. *Mental Health, United States* is used by the general public, state governments, the U.S. Congress, university researchers, and other health care professionals. The following table summarizes the burden for the survey.

Questionnaire	Number of respondents	Responses/respondent	Average hours/response	Total burden (Hrs.)
Phase I (Inventory)
