POLICY JUSTIFICATION

Australia—EA–18G Growler Aircraft and Related Defense Services

The Government of Australia has requested to buy a United States Navy (USN) EA–18G aircraft. The USN EA–18G aircraft will then be modified into a Royal Australian Air Force (RAAF) EA–18G aircraft configuration. The sale would include one (1) EA–18G Growler aircraft (Lot 38 or later) and engineering and modification; verification and validation flight test efforts; maintenance and storage; U.S. Government and contractor engineering/technical assistance; related studies and analysis support; and other related elements of programmatic, technical and logistics support. The total estimated value is \$125 million.

This proposed sale will support the foreign policy and national security objectives of the United States. Australia is one of our most important allies in the Western Pacific. The strategic location of this political and economic power contributes significantly to ensuring peace and economic stability in the region. It is vital to the U.S. national interest to assist our ally in developing and maintaining a strong and ready self-defense capability.

This proposed sale will allow Australia to effectively maintain its current force projection capability that enhances interoperability with U.S. forces well into the future and maintain their original primary level of aircraft authorized. This aircraft would replace Australia's EA–18G A46–311 aircraft lost in an accident at Nellis Air Force Base. Australia currently employs the EA–18G and will have no difficulty absorbing this equipment into its armed forces.

The proposed sale of this aircraft and follow-on support will not alter the basic military balance in the region.

These aircraft will be provided from U.S. Navy stock. There are no known offset agreements proposed in connection with this potential sale.

Implementation of the proposed sale will require U.S. Government and

contractor personnel to visit Australia on a temporary basis in conjunction with program technical oversight and support requirements, including program and technical reviews.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 21–58

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex

Item No. vii

(vii) *Sensitivity of Technology:*

1. The EA–18G is a derivative of the two-seat F/A–18F Super Hornet that performs an array of airborne electronic attack (AEA) missions. The EA–18G integrates the capabilities of an advanced AEA system, as well as other complementary systems to provide one of the most capable AEA platforms in the world.

2. The highest level of classification of defense articles, components, and services included in this potential sale is SECRET.

3. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures that might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.

4. A determination has been made that Australia can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.

5. All defense services listed in this transmittal have been authorized for release and export to the Government of Australia.

SUPPLEMENTARY INFORMATION:

I. Background

DoD is establishing the DoD Patron Authorization, Retail, and Service Activities, DoD–0018, system of records as a DoD-wide Privacy Act system of records. A DoD-wide system of records notice (SORN) supports multiple DoD paper or electronic recordkeeping systems operated by more than one DoD component that maintains the same or

similar kind of information about individuals for the same purpose. Establishment of DoD-wide SORNs help DoD standardize the rules governing the collection, maintenance, use, and sharing of personal information in key areas across the enterprise. DoD-wide SORNs also reduce duplicative and overlapping SORNs published by separate DoD components. The creation of DoD-wide SORNs is expected to make locating relevant SORNs easier for DoD personnel and the public and create efficiencies in the operation of the DoD privacy program.

DoD includes multiple activities which provide goods and services to DoD patrons, their family members, and dependents; visitors to military installations; and other individuals who are affiliated to the military community or the Department (collectively, DoD patrons). Among those activities are military exchanges to include the Army and Air Force Exchange Service (AAFES), the Marine Corps Exchange (MCX), and the Navy Exchange Service Command (NEX), and the Marine Corps Community Services (MCCS), along with the Defense Commissary Agency (DeCA). Each of these types of activities offer a benefit to our military community and those with ties to this community.

This new SORN addresses the collection of general personal financial and business transaction records associated with the benefits provided by organizations such as the military exchanges above and other vendors located on military installations. Included data may consist of biographical information of DoD patrons for identification purposes, personal contact information, military connection, personal financial information, for processing payments and credit requests, records of those patrons who are on the bad check and outstanding debt list, source of patron authorization, and demographic data. Usage of the information includes account maintenance and collection efforts, providing the services requested, and marketing initiatives. Collected data will ensure individuals affiliated with the military are not only authorized to obtain goods, items, and services, but also are able to engage and participate in Exchange transactional matters associated with approved benefits, and payments.

DoD SORNs have been published in the **Federal Register** and are available from the address in **FOR FURTHER INFORMATION CONTACT** or at the Privacy, Civil Liberties, and Freedom of Information Directorate website at <https://dpcl.d.defense.gov>.

II. Privacy Act

Under the Privacy Act, a “system of records” is a group of records under the control of an agency from which information is retrieved by the name of an individual or by some identifying number, symbol, or other identifying particular assigned to the individual. In the Privacy Act, an individual is defined as a U.S. citizen or lawful permanent resident.

In accordance with 5 U.S.C. 552a(r) and Office of Management and Budget (OMB) Circular No. A-108, DoD has provided a report of this system of records to the OMB and to Congress.
