Records Governing Off-the-Record Communications; Public Notice

August 6, 2004.

This constitutes notice, in accordance with 18 CFR 385.2201(b), of the receipt of exempt and prohibited off-the-record communications.

Order No. 607 (64 FR 51222, September 22, 1999) requires Commission decisional employees, who make or receive an exempt or prohibited off-the-record communication relevant to the merits of a contested on-the-record proceeding, to deliver a copy of the communication, if written, or a summary of the substance of any oral communication, to the Secretary.

Prohibited communications will be included in a public, non-decisional file associated with, but not a part of, the decisional record of the proceeding. Unless the Commission determines that the prohibited communication and any responses thereto should become a part of the decisional record, the prohibited off-the-record communication will not be considered by the Commission in reaching its decision. Parties to a proceeding may seek the opportunity to respond to any facts or contentions made in a prohibited off-the-record

communication, and may request that the Commission place the prohibited communication and responses thereto in the decisional record. The Commission will grant such a request only when it determines that fairness so requires. Any person identified below as having made a prohibited off-the-record communication shall serve the document on all parties listed on the official service list for the applicable proceeding in accordance with Rule 2010, 18 CFR 385.2010.

Exempt off-the-record communications will be included in the decisional record of the proceeding, unless the communication was with a cooperating agency as described by 40 CFR 1501.6, made under 18 CFR 385.2201(e)(1)(v).

The following is a list of prohibited and exempt communications recently received in the Office of the Secretary. The communications listed are grouped by docket numbers. Title: Combined Sewer Overflow Control Policy (OMB Control No. 2040-0170; EPA ICR No. 1680.03) expiring on October 31, 2004.

Abstract: EPA is proposing to continue its ICR for the Combined Sewer Overflow (CSO) Control Policy. The ICR was approved in April 1994. This renewal ICR includes the burden associated with documenting implementation of the nine minimum controls identified in the CSO control policy, public notification of CSO events and their impacts, developing and submitting long-term CSO control plans (LTCPs), and post-construction compliance monitoring.

Combined sewer systems (CSSs) serve approximately 770 municipalities, primarily in the Northeast and Great Lakes regions. This number is smaller than that in the former ICR largely
