SUPPLEMENTARY INFORMATION:

Information Collection Request Title: Ryan White HIV/AIDS Program Part F Dental Services Report.

OMB No. 0915–0151—Revision.

Abstract: The Dental Reimbursement Program (DRP) and the Community Based Dental Partnership Program (CBDPP) under Part F of the Ryan White HIV/AIDS Program offer funding to accredited dental education programs to support the provision of oral health services for HIV-positive individuals. Institutions eligible for these Ryan White HIV/AIDS programs are accredited schools of dentistry, postdoctoral dental education programs, and dental hygiene programs. The DRP Application is the Dental Services Report (DSR) that schools and programs use to apply for funding of non-reimbursed costs incurred in providing oral health care to patients with HIV, or to report annual program data. Awards are authorized under section 2692(b) of the Public Health Service Act (42 U.S.C. 300ff–111(b)). The DSR collects data in four different areas: program information, patient demographics and services, funding, and training. It also requests applicants provide narrative descriptions of their services and facilities, as well as how they are working together with other local Ryan White HIV/AIDS Program-supported programs. The form used to collect this information is being revised to comply with the National HIV/AIDS Strategy directive to standardize data collection and reduce grantee reporting burden. The revised form implements data collection standards for race, ethnicity, and sex and eliminates some narrative description items; however, the average burden per response is anticipated to remain unchanged.

Need and Proposed Use of the Information: The primary purpose of collecting this information annually is to verify eligibility and determine reimbursement amounts for DRP applicants, as well as to document the program accomplishments of CBDPP grant recipients. This information also allows HRSA to learn about (1) the extent of the involvement of dental schools and programs in treating patients with HIV, (2) the number and characteristics of clients who receive HIV/AIDS program supported oral health services, (3) the types and frequency of the provision of these
