

considerations added on maximum grades, drainage issues, parking issues, scenic values, fish and wildlife habitat, water quality, and wind erosion; minimum requirements for plan and specification content were added; minimum requirements for O&M plans added; and references were added.

Vegetative Barrier (Code 601)—The primary revision included the addition to use the Revised Universal Soil Loss Equation, Version 2 (RUSLE2) for the design and spacing of the vegetative barriers. Other revisions included edits to improve clarity.

Prescribed Forestry (Code 409)—Rescission of this practice will be effective October 1, 2009. This practice has been replaced by Forest Management Plan (Code 106).

Signed this 20th day of August 2009, in Washington, DC.

Dave White,
Chief.

BILLING CODE 3410-16-P

CHEMICAL SAFETY AND HAZARD INVESTIGATION BOARD

Sunshine Act Meeting—September 15, 2009—6 p.m.

In connection with its investigation into the cause of a December 19, 2007, explosion and subsequent chemical fire at the T2 Laboratories, Inc., a chemical manufacturer in Jacksonville, Florida, the Chemical Safety and Hazard Investigation Board announces that it will convene a public meeting on September 15, 2009, starting at 6 p.m. at the Marriott Hotel located at 4670 Salisbury Rd in Jacksonville, Florida in "The Florida Room."

At the meeting CSB staff will present to the Board the results of their investigation into this incident. Key issues involved in the investigation concern reactive hazard recognition, hazard education, emergency preparedness, and process design and scale-up. This will be followed by a public comment period prior to a Board vote on the report.

Incident Description: On December 19th, T2 Laboratories, Inc. was producing a batch of methylcyclopentadienyl manganese tricarbonyl (MCMT). A problem soon occurred and the process operator had an outside operator call the owners to report a cooling problem and request they return to the site. Upon their return, one of the two owners went to the control room to assist. A few minutes later, the reactor burst and its

contents exploded, killing the owner and process operator who were in the control room and two outside operators who were exiting the reactor area. It also injured 32, including four employees and 28 members of the public who were working in surrounding businesses. Debris from the reactor was found up to one mile away, and the explosion damaged buildings within one quarter mile of the facility.

Following the staff presentation and the conclusion of the public comment period, the Board will consider whether to approve the final report and recommendations. All staff presentations are preliminary and are intended solely to allow the Board to consider in a public forum the issues and factors involved in this case. No factual analyses, conclusions or findings presented by staff should be considered final. Only after the Board has considered the final staff presentation, listened to the witnesses and the public comments and approved the staff report will there be an approved final record of this incident.

The meeting will be open to the public. Please notify CSB if a translator or interpreter is needed, at least 5 business days prior to the public meeting. For more information, please contact the Chemical Safety and Hazard Investigation Board at (202) 261-7600, or visit our Web site at: <http://www.csb.gov>.

Christopher W. Warner,
General Counsel.

BILLING CODE 6350-01-P

DEPARTMENT OF COMMERCE

Submission for OMB Review; Comment Request

The Department of Commerce will submit to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

Agency: U.S. Census Bureau.

Title: 2009—2011 Company Organization Survey.

Form Number(s): NC-99001, NC-99007.

OMB Control Number: 0607-0444.

Type of Request: Extension of a currently approved collection.

Burden Hours: 127,517.

Number of Respondents: 48,000.

Average Hours per Response: 2 hours and 40 minutes.

Needs and Uses: The Census Bureau is requesting an extension of the

currently approved Company Organization Survey (COS) to conduct the 2009, 2010 and 2011 COS. This collection will direct inquiries to multi-establishment enterprises and selected single-establishment companies. The Census Bureau conducts the annual COS in order to update and maintain a central, multipurpose Business Register (BR). In particular, the COS supplies critical information on the organizational structure, operating characteristics, and employment and payroll of multi-location enterprises. The 2009-2011 COS collection will not differ from the 2008. The sample size will remain the same as in 2008 surveying 48,000 respondents.

Form NC-99001 is mailed to multi-location enterprises. We ask questions on ownership or control by a domestic parent, ownership or control by a foreign parent, and ownership of foreign affiliates; research and development, and employees from a professional employer organization. Establishment inquiries include questions on operational status, mid-March employment, first-quarter payroll, and annual payroll of establishments (see Attachment A, Item 5 of NC-99001).

In addition to the mailing of multi-location enterprises, the Census Bureau will mail Form NC-99007 to some large single-location enterprises that may have added some locations. Form NC-99007 contains questions on ownership and control by a domestic company, number of locations of operation, physical location, locations of operation, and inquiries on mid-March employment, first-quarter payroll, and annual payroll for each separate location.

The BR serves two fundamental purposes: First and most important, it provides sampling populations and enumeration lists for the Census Bureau's economic surveys and censuses, and it serves as an integral part of the statistical foundation underlying those programs. Essential for this purpose is the BR's ability to identify all known United States business establishments and their parent companies. Further, the BR must accurately record basic business attributes needed to control sampling and enumeration. These attributes include industrial and geographic classifications, measures of size and economic activity, ownership characteristics, and contact information (for example, name and address).

Second, it provides establishment data that serve as the basis for the annual County Business Patterns (CBP) statistical series. The CBP reports present data on number of
