DEPARTMENT OF JUSTICE

Notice of Lodging of Proposed First Amendment to Consent Decree Under the Clean Air Act

On January 14, 2015, the Department of Justice lodged a proposed first amendment to a consent decree with the United States District Court for the Southern District of Ohio in the lawsuit entitled *United States, et al. v. INEOS ABS (USA) Corporation, et al.*, Civil Action No. 1:09-CV-00545.

Under the original 2010 consent decree, INEOS ABS (USA) Corporation (“INEOS”) agreed to undertake numerous measures to come into compliance with various environmental statutes and regulations at its facility in Addyston, Ohio, including certain measures designed to control hazardous air pollutant emissions from the facility’s flare and volatile organic compound emissions from equipment leaks. Since the entry of the original consent decree, issues involving the implementation of and compliance with certain consent decree provisions have arisen. Under the proposed First Amendment, INEOS will comply with a final limit of the net heating value in its flare gas that will ensure 99% control efficiency at the flare, which is the control efficiency requirement in the facility’s permit. INEOS also will pay a penalty of \$240,000 for alleged violations of certain leak detection and repair (“LDAR”) provisions of the original decree (which are based on regulations promulgated under the Clean Air Act, 42 U.S.C. §§ 7401, *et seq.*).

The publication of this notice opens a period of public comment on the first amendment. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, and should refer to *United States, et al. v. INEOS ABS (USA) Corporation, et al.*, D.J. Notice is hereby given that, for a period of 30 days, the United States will receive public comments on the proposed Consent Decree.

The injunctive measures to be undertaken by Fort Smith include conducting a comprehensive inspection of its collection system for condition defects, increasing capacity of sewer lines, where needed, repairing, rehabilitating or replacing sewer lines with significant defects, upgrading

pump stations, and developing and implementing a "capacity, management, operation and maintenance plan" to further reduce the incidence of sanitary sewer overflows. Information provided by Fort Smith indicates that the work is expected to cost \$255 million in current dollars, plus the cost of routine operation and maintenance. Fort Smith will also implement a Supplemental Environmental Project aimed at assisting qualified low income
