in the computation of the Federal grants awarded under the Program.

**DATES:** *Effective Date:* The allotment percentages shall be effective for Fiscal Years 2010 and 2011.

**FOR FURTHER INFORMATION CONTACT:** Deborah Bell, Grants Fiscal Management Specialist, Office of Grants Management, Office of Administration, Administration for Children and Families, telephone (202) 401–4611.

**SUPPLEMENTARY INFORMATION:** The allotment percentage for each State is determined on the basis of paragraphs (b) and (c) of section 423 of the Act. These figures are available on the ACF homepage on the Internet: *http://www.acf.dhhs.gov/programs/cb/*. The allotment percentage for each State is as follows:

| State | Allotment percentage |
|---|---|
| Alabama | 57.84 |
| Alaska | 48.05 |
| Arizona | 56.38 |
| Arkansas | 61.11 |
| California | 46.00 |
| Colorado | 45.84 |
| Connecticut | 29.80 |
| Delaware | 47.41 |
| District of Columbia | 30.00 |
| Florida | 49.99 |
| Georgia | 55.97 |
| Hawaii | 49.58 |
| Idaho | 58.77 |
| Illinois | 47.38 |
| Indiana | 56.49 |
| Iowa | 54.98 |
| Kansas | 53.08 |
| Kentucky | 59.84 |
| Louisiana | 57.58 |
| Maine | 55.90 |
| Maryland | 39.77 |
| Massachusetts | 36.86 |
| Michigan | 54.78 |
| Minnesota | 46.78 |
| Mississippi | 63.23 |
| Missouri | 55.60 |
| Montana | 57.46 |
| Nebraska | 53.19 |
| Nevada | 47.38 |
| New Hampshire | 46.11 |
| New Jersey | 36.67 |
| New Mexico | 60.11 |
| New York | 40.20 |
| North Carolina | 55.99 |
| North Dakota | 54.67 |
| Ohio | 54.92 |
| Oklahoma | 55.55 |
| Oregon | 54.50 |
| Pennsylvania | 49.89 |
| Rhode Island | 48.70 |
| South Carolina | 59.40 |
| South Dakota | 54.49 |
| Tennessee | 56.26 |
| Texas | 52.11 |
| Utah | 60.33 |
| Vermont | 52.12 |
| Virginia | 45.62 |
| Washington | 47.36 |
| West Virginia | 62.02 |
| Wisconsin | 52.98 |
| Wyoming | 41.29 |
| American Samoa | 70.00 |
| Guam | 70.00 |
| N. Mariana Islands | 70.00 |
| Puerto Rico | 70.00 |
| Virgin Islands | 70.00 |

Dated: October 21, 2008.

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### Substance Abuse and Mental Health Services Administration

### Agency Information Collection Activities: Proposed Collection; Comment Request

In compliance with Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 concerning opportunity for public comment on proposed collections of information, the Substance Abuse and Mental Health Services Administration (SAMHSA) will publish periodic summaries of proposed projects. To request more information on the proposed projects or to obtain a copy of the information collection plans, call the SAMHSA Reports Clearance Officer on (240) 276–1243.

Comments are invited on: (a) Whether the proposed collections of information are necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

**Proposed Project: SAMHSA Fetal Alcohol Spectrum Disorders Center for Excellence Screening and Brief Intervention Evaluation—New**

Since 2001, SAMHSA's Center for Substance Abuse Prevention has been operating the SAMHSA Fetal Alcohol Spectrum Disorders (FASD) Center for Excellence. The purpose of the FASD Center is to prevent FASD and improve the treatment of FASD. The FASD Center's activities include providing training, technical assistance, and subcontracts to increase the use of effective evidence-based interventions.

The FASD Center will be integrating Screening and Brief Intervention (SBI) for pregnant women through service delivery organizations and will be evaluating the results. Seven sites will implement the SBI program operated through WIC or Healthy/Health Start. Using the protocol developed by O'Connor and Whaley, each of the participating WIC and Healthy Start programs will be screening pregnant women to identify those who are currently drinking. The SBI focuses on 10- to 15-minute sessions of counseling by a counselor who will use a scripted manual to guide the intervention. Participants in the SBI will be assessed at each visit (to monitor alcohol use), referred for additional services to support their efforts to stop drinking, and will be provided with the 10–15 minute intervention. Clients will be followed up until their 36th week of pregnancy.

At baseline, a screening tool will be administered by the WIC or Healthy/Health Start counselor to assess pregnant women at the participating sites or health care delivery programs. Women will be assessed for risk using the T–ACE or TWEAK screening instruments which have been used successfully with pregnant women. Both quantity and frequency of drinking will be assessed. In addition, basic demographic data will be collected (age, race/ethnicity, education, and marital status) at baseline by participating sites but no personal identification information will be transmitted to SAMHSA.

On a monthly basis, as clients return for their WIC or Healthy/Health Start program counseling session, follow-up data will be collected by the WIC or Healthy Start counselor. At each monthly follow-up visit, the quantity and frequency of drinking will be assessed and the client's goals for drinking will be recorded. In addition, process level variables will be assessed to understand how the program is being implemented (e.g., whether SBI was delivered; what referrals were made; which referral services were received). At the 36th week of pregnancy, the client will be asked for permission to place her record from this program into her infant's medical record (upon delivery) and quantity and frequency of drinking will be assessed.

The data collection is designed to evaluate the implementation of the proposed Screening and Brief

Intervention by measuring whether abstinence from alcohol is achieved. Furthermore, the project will include process measures to assess whether and how the intervention was provided.

ESTIMATED ANNUALIZED BURDEN HOURS

| Screening tool/activity | Number of respondents (7 Sites) | Number of responses per respondent | Average burden per response | Total burden hours per collection |
|---|---|---|---|---|
| Assessment/Baseline Data Collection | 3,428 | 1 | .25 | 857 |
| Monthly Follow-up (75% of baseline × 4 months maximum) | 2,571 | 4 | .33 | 3,393 |
| Assessment Data Collection at 36th week (75% of baseline) | 2,571 | 1 | .25 | 642 |
| Total | 8,570 | 6 | | 4,892 |

Send comments to Summer King, SAMHSA Reports Clearance Officer, Room 7–1044, One Choke Cherry Road, Rockville, MD 20857. Written comments should be received within 60 days of this notice.

Dated: October 23, 2008.

**Proposed Project: Training and Technical Assistance in the Fetal Alcohol Spectrum Disorders (FASD) Center for Excellence—New**

Since 2001, the Fetal Alcohol Spectrum Disorders (FASD) Center for Excellence has been operating under contract to SAMHSA's Center for Substance Abuse Prevention. The purpose of the FASD Center for Excellence is to prevent FASD and improve the treatment of FASD. As a cornerstone of the services delivered by the FASD Center for Excellence, targeted training, technical assistance, and consultation is provided in order to significantly improve immediate, intermediate, and long-term outcomes in the prevention and treatment of FASD.

The purpose of this submission is to obtain approval for the use of customer satisfaction feedback forms to be used by FASD Center for Excellence to monitor the delivery and quality of technical assistance, training, and consultation services. Based on estimates derived from a review of the services provided in the first 5 years of operation, the FASD Center for Excellence expects to conduct approximately 240 trainings, 5 informational meetings, and 150 technical assistance events over the course of their contract with SAMHSA. Presentations are available nationwide and can vary in topic and length depending on audience characteristics and presentation setting. Data collection protocols will vary slightly for different types of services and are presented separately for trainings, meetings, and technical assistance services.

*Trainings*

In keeping with theories of behavior change, changes in knowledge about FASD (for general trainings) and about topic-specific FASD issues (for advanced trainings) will be measured using a pre- and post-test methodology. The pre-test form will also include questions about participants' demographic background and professional affiliation. Participant evaluation forms will be administered immediately following a training event in order to assess customer satisfaction. The post-event evaluation form consists of a brief 2 page questionnaire that asks participants to rate the speaker, identify the most and least helpful features of the presentation, and assess their satisfaction with the services provided. A paper-and-pencil format will be utilized to collect participant responses, although a link to an online survey may be provided at the conclusion of a Webinar or other online presentation. Follow-up will occur both 3 and 6 months after the training either through a brief online survey or a telephone interview. Non-respondents will receive one follow up reminder e-mail.

*Informational Meetings*

Informational meetings that involve field trainers, who deliver the majority of the Center's FASD trainings, will utilize a pre- and post-test methodology to assess changes in knowledge. In addition, pre-test forms will also gather information about field trainers' cultural background, professional setting, and number of years of experience in the field. Post-test questionnaires will evaluate both knowledge and customer satisfaction immediately following informational meetings. Follow up occurs both at 6 and 12 months after the meeting through either a brief online survey or a telephone interview. Non-respondents will receive one follow up reminder e-mail.

No pre-test forms will be used for informational meetings that do not involve field trainers. Meeting feedback surveys will be administered immediately following informational meetings, and will both assess customer satisfaction and gather background information about participant demographics and professional affiliation. No long-term follow up activity is anticipated for informational
