b. Explain why you agree or disagree; suggest alternatives and substitute language for your requested changes.

c. Describe any assumptions and provide any technical information and/or data that you used.

d. If you estimate potential costs or burdens, explain how you arrived at your estimate in sufficient detail to allow for it to be reproduced.

e. Provide specific examples to illustrate your concerns, and suggest alternatives.

g. Make sure to submit your comments by the comment period deadline identified.

2. *Submitting CBI.* Do not submit information that you consider to be CBI electronically through EPA's electronic public docket or by e-mail. Commenters wishing to submit proprietary information for consideration must clearly distinguish such information from other comments and clearly label it as CBI. Send submissions containing such proprietary information directly to the following address only, and not to the public docket, to ensure that proprietary information is not inadvertently placed in the docket: Attention: OEI Document Control Officer, Mail Code: 2822T, U.S. EPA, 1200 Pennsylvania Ave., NW., Washington, DC 20460. You may claim information that you submit to EPA as CBI by marking any part or all of that information as CBI (if you submit CBI on disk or CD ROM, mark the outside of the disk or CD ROM as CBI and then identify electronically within the disk or CD ROM the specific information that is CBI). EPA will disclose information claimed as CBI only to the extent allowed by the procedures set forth in 40 CFR part 2.

In addition to one complete version of the comment that includes any information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket and EPA's electronic public docket. If you submit the copy that does not contain CBI on disk or CD ROM, mark the outside of the disk or CD ROM clearly that it does not contain CBI. Information not marked as CBI will be included in the public docket and EPA's electronic public docket without prior notice. If you have any questions about CBI or the procedures for claiming CBI, please consult the person identified in the **FOR FURTHER INFORMATION CONTACT** section.

D. What Information Is EPA Particularly Interested In?

Pursuant to section 3506(c)(2)(a) of the Paperwork Reduction Act (PRA), EPA specifically solicits comments and information to enable it to:

(i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(ii) Evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(iii) Enhance the quality, utility, and clarity of the information to be collected; and

(iv) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

E. To What Information Collection Activity or ICR Does This Notice Apply?

EPA is seeking comments on the following ICR, as well as the Agency's intention to renew the corresponding OMB approval, which is currently scheduled to expire on January 31, 2006.

Title: Toxic Chemical Release Reporting; Request for Comments of Renewal and Proposed Changes

Abstract: EPCRA section 313 requires owners and operators of certain facilities that manufacture, process, or otherwise use any of over 650 listed toxic chemicals and chemical categories in excess of applicable threshold quantities to report annually to the Environmental Protection Agency and to the states in which such facilities are located on their environmental releases and transfers of and other waste management activities for such chemicals. In addition, section 6607 of the Pollution Prevention Act (PPA) requires that facilities provide information on the quantities of the toxic chemicals in waste streams and the efforts made to reduce or eliminate those quantities.

Annual reporting under EPCRA section 313 of toxic chemical releases and other waste management information provides citizens with a more complete picture of the total disposition of chemicals in their communities and helps focus industry's attention on pollution prevention and source reduction opportunities. EPA believes that the public has a right to know about the disposition of chemicals within communities and the management of such chemicals by facilities in industries subject to EPCRA section 313 reporting. This reporting has been successful in providing communities with important information regarding the disposition of toxic chemicals and other waste management information of toxic chemicals from manufacturing facilities in their areas.

EPA collects, processes, and makes available to the public all of the information collected. The information gathered under these authorities is stored in a database maintained at EPA

and is available through the Internet. This information, commonly known as the Toxics Release Inventory (TRI), is used extensively by both EPA and the public sector. Program offices within EPA use TRI data, along with other sources of data, to establish priorities, evaluate potential exposure scenarios, and undertake enforcement activities. Environmental and public interest groups use the data in studies and reports, making the public more aware of releases of chemicals in their communities.

Comprehensive publicly-available data about releases, transfers, and other waste management activities of toxic chemicals at the community level are generally not available, other than under the reporting requirements of EPCRA section 313. Permit data are often difficult to obtain, are not cross-media and present only a limited perspective on a facility's overall performance. With TRI, and the real gains in understanding it has produced, communities and governments know what toxic chemicals industrial facilities in their area release, transfer, or otherwise manage as waste. In addition, industries have an additional tool for evaluating efficiency and progress on their pollution prevention goals.

Responses to the collection of information are mandatory (*see* 40 CFR part 372). Respondents may claim all or part of a notice confidential. EPA will disclose information that is covered by a claim of confidentiality only to the extent permitted by, and in accordance with, the procedures in TSCA section 14 and 40 CFR part 2.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR Chapter 15.

F. What Are EPA's Burden and Cost Estimates for This ICR?

Burden Statement: Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of

information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information. The annual public burden for this collection of information, which is approved under OMB Control No. 2070-0093, is estimated to average 47.1 hours for facilities submitting a Form R certification statement for a single listed PBT chemical and 25.2 hours for a Form R certification statement for a single listed non-PBT chemical. The ICR supporting statement provides a detailed explanation of the burden estimates that are summarized in this notice. The following is a summary of the estimates taken from the ICR supporting statement: Estimated No. of Respondents: 22,000 respondents. Frequency of Responses: Annual. Estimated Total Annual Burden Hours: 3,796,414 burden hours. Estimated Total Annual Burden Costs: \$ 1.75 million.

G. What Are the Proposed Changes This ICR?

No changes are proposed. EPA is seeking a two-year renewal of the current TRI ICR No. 1363.13.

H. Are There Changes in the Estimates From the Last Approval?

No changes are proposed in estimates used and approved in the current TRI ICR.

I. What Is the Next Step in the Process for This ICR?

EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. EPA will issue another **Federal Register** notice pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the person(s) listed in the **FOR FURTHER INFORMATION CONTACT** section above.

Dated: May 10, 2005.
