BILLING CODE 6335-01-P

Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: National Oceanic and Atmospheric Administration (NOAA).

Title: Cook Inlet Beluga Whale Protection Pretest Economic Survey.

OMB Control Number: None.

Form Number(s): NA.

Type of Request: Regular submission (request for review of a new information collection).

Number of Respondents: 298.

Average Hours per Response: Full survey, 25 minutes. Follow-up telephone call with short interview, 5 minutes.

Burden Hours: 102.

Needs and Uses: The population of Cook Inlet beluga whales found in the Cook Inlet of Alaska is one of five distinct population segments in United States (U.S.) waters. It was listed as endangered under the Endangered Species Act on October 22, 2008 (73 FR 62919). The public benefits associated with the results of protection actions on the Cook Inlet beluga whale, such as population increases, are primarily the result of the non-consumptive value people attribute to such protection (e.g., active use values associated with being able to view beluga whales and passive use values unrelated to direct human use). Little is known about these values, yet such information is needed for decision makers to more fully understand the trade-offs involved in choosing among potential protection alternatives and to complement other information available about the costs, benefits, and impacts of protection alternatives.

The National Marine Fisheries Service plans to conduct a pilot survey to test a survey instrument that will be used to collect data for measuring the economic benefits the public receives for providing additional protection, beyond current levels, to the Cook Inlet beluga whale. These preferences are currently not known, but are needed to assist in the evaluation of alternative measures to further protect and recover the species' population, such as in the evaluation of critical habitat designations. The pilot survey consists of conducting a small-scale mail-telephone survey of U.S. households that will collect information needed to evaluate the survey instrument and implementation procedures.

Affected Public: Individuals or households.

Frequency: One time.

Respondent's Obligation: Voluntary.

**Gulf of the Farallones National Marine Sanctuary Permit Application Project
Titled: Fine Scale, Long-Term Tracking
of Adult White Sharks**

AGENCY: Office of National Marine Sanctuaries (ONMS), National Ocean Service (NOS), National Oceanic and Atmospheric Administration (NOAA), Department of Commerce (DOC).

ACTION: Draft environmental assessment; notice of availability; request for public comment.

SUMMARY: The Gulf of the Farallones National Marine Sanctuary (GFNMS) has developed a draft environmental assessment (EA) pursuant to the National Environmental Policy Act (42 U.S.C. 4321, *et seq.*) to analyze the potential impacts of issuing a research permit that would allow the attraction and approach of white sharks in the sanctuary. The purpose of the proposed study is to improve our knowledge of the full migratory cycle of white sharks by attaching location transmitters to up to eleven (11) white sharks that seasonally visit the sanctuary. The EA is available for download on the web site: http://farallones.noaa.gov/eco/sharks/pdf/ea_mcsi_permit2009.pdf.

DATES: Comments on this draft environmental assessment may be made on or before October 15, 2010.

ADDRESSES: Comments may be submitted by any of the following methods:

- **Mail:** Carliane Johnson, Acting Permit Coordinator, Gulf of the Farallones National Marine Sanctuary, The Presidio, 991 Marine Drive, San Francisco, CA 94129.
