SUPPLEMENTARY INFORMATION:

I. Background

In the **Federal Register** of May 25, 2010 (75 FR 29352), FDA published the notice of availability for a draft guidance #188 entitled "Data Elements for Submission of Veterinary Adverse Event Reports to the Center for Veterinary Medicine," giving interested persons until August 9, 2010, to comment on the draft guidance. FDA made changes to the draft document in response to these comments, to clarify the information that we expect to receive, to reflect ongoing International Cooperation on Harmonization of Technical Requirements for Registration of Veterinary Medicinal Products (VICH) activities in which FDA is participating, and to provide direction for voluntary use of CVM internal terms for medication errors. In addition, editorial changes were made to improve clarity. The guidance announced in this notice finalizes the draft guidance dated May 24, 2010.

II. Significance of Guidance

This level 1 guidance is being issued consistent with FDA's good guidance practices regulation (21 CFR 10.115). The guidance represents the Agency's current thinking on the topic. It does not create or confer any rights for or on any person and does not operate to bind FDA or the public. An alternative approach may be used if such approach satisfies the requirements of the applicable statutes and regulations.
