**POLICY JUSTIFICATION**

*The Netherlands—AIM-9X Block II Missiles*

The Government of the Netherlands has requested to buy seventy-two (72) AIM-9X Block II Tactical Missiles; and forty-three (43) AIM-9X Block II+ Tactical Missiles that will be added to a previously implemented case. The original FMS case, valued at \$16.8 million, included twenty-three (23) AIM-9X Block II Tactical Missiles. The Netherlands has also requested a new FMS case for twenty-two (22) AIM-9X Block II Tactical Missiles; forty-three (43) AIM-9X Block II+ Tactical Missiles; and one (1) AIM-9X Block II+ Tactical Guidance Unit. Therefore, this notification is for a total of ninety-five (95) AIM-9X Block II Tactical Missiles; forty-three (43) AIM-9X Block II+ Tactical Missiles; and one (1) AIM-9X Block II+ Tactical Guidance Unit. Also included are containers; classified and unclassified software; U.S. Government and contractor technical assistance; and other related elements of logistical and program support. The total estimated cost is \$117 million.

This proposed sale will support the foreign policy and national security objectives of the United States by helping to improve the security of a North Atlantic Treaty Organization (NATO) ally that is an important force for political stability and economic progress in Europe.

The proposed sale will enable the Royal Netherlands Air Force (RNAF) to provide stronger support for the Netherlands' air defense needs. This proposed sale of AIM-9X missiles will improve the RNAF's capability to

conduct self-defense and regional security missions, enhancing interoperability with the U.S. and other NATO members. The Netherlands will have no difficulty absorbing these missiles into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractor will be Raytheon Missiles and Defense, Tucson, AZ. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this sale will not require the assignment of any U.S. Government or contractor representatives to the Netherlands.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 22-25

Notice of Proposed Issuance of Letter of Offer and Acceptance Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex

Item No. vii

(vii) *Sensitivity of Technology:*

1. The AIM-9X Block II and Block II+ (Plus) Missile (including the Guidance Unit) replaces the AIM-9X Block I Missile configuration. The missile includes a high off-boresight seeker, enhanced countermeasure rejection capability, low drag/high angle of attack airframe and the ability to integrate the Helmet Mounted Cueing System. The software algorithms are the most sensitive portion of the AIM-9X missile. The software continues to be modified via a pre-planned product improvement (P3I) program in order to improve its counter-countermeasure capabilities. No software source code or algorithms will be released.

2. The highest level of classification of defense articles, components and services included in this potential sale is SECRET.

3. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures that might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.

4. A determination has been made that the Netherlands can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.

5. All defense articles and services listed in this transmittal have been authorized for release and export to the Government of the Netherlands.

#### SUPPLEMENTARY INFORMATION:

*Title; Associated Form; and OMB Number:* Defense Information System for Security; OMB Control Number 0705-0008.

*Needs and Uses:* This information collection is necessary as the Defense Information System for Security (DISS) system requires personal data collection to facilitate the initiation, investigation and adjudication of information relevant to DoD security clearances and employment suitability determinations for active duty military, civilian employees and contractors requiring such credentials. The respondents for this information collection are 45,377 Facility Security Officers (FSOs) working in industry companies, who are responsible for the regular servicing and updating of the DISS records of individuals with an industry person category. The specific purpose of this information collection is for FSOs to

update the DISS records of contractor personnel within their company and Security Management Office to facilitate DoD Adjudicators and Security Managers obtaining accurate up-to-date eligibility and access information on contractor personnel. FSO respondents electronically collect, update, and complete the collection directly into the DISS application.

*Affected Public:* Individuals or households.

*Annual Burden Hours:* 680,655.

*Number of Respondents:* 45,377.

*Responses per Respondent:* 45.

*Annual Responses:* 2,041,965.

*Average Burden per Response:* 20 minutes.

*Frequency:* On occasion.

The DISS is a DoD personnel security system and is the authoritative source for clearance information resulting in access determinations to sensitive/classified information and facilities. Collection and maintenance of personal data in DISS is required to facilitate the initiation, investigation and adjudication of information relevant to DoD security clearances and employment suitability determinations for active duty military, civilian employees, and contractors requiring such credentials. FSOs working in private companies that contract with DoD and who need access to the DISS system to update security-related information about their company's employees must complete DD Form 2962 (OMB Control Number 0704-0542). Specific uses include: Facilitation for DoD Adjudicators and Security Managers to obtain accurate up-to-date eligibility and access information on all personnel (military, civilian and contractor personnel) adjudicated by the DoD. The DoD Adjudicators and Security Managers are also able to update eligibility and access levels of military, civilian and contractor personnel nominated for access to sensitive DoD information. Once granted access, the FSOs maintain employee personal information, submit requests for investigations, and submit other relevant personnel security information into DISS on over 1,000,000 contract employees annually.
