Animal and Plant Health Inspection Service

Title: Cooperative Agricultural Pest Survey.

OMB Control Number: 0579–0010.

Summary of Collection: The Plant Protection Act (7 U.S.C. 3301—*et seq.*) authorizes the Secretary of Agriculture, either independently or in cooperation with States, to carry out operations or measures to detect, eradicate, suppress, control, prevent, or retard the spread of plant pests and noxious weeds. The Animal and Plant Health Inspection Service (APHIS), Plant Protection and Quarantine (PPQ), along with the States and other agencies, collects and manages data on plant pests, woods, and biological control agents through the Cooperative Agricultural Pest Survey (CAPS). The program allows the States and PPQ to conduct surveys to detect and measure the presence of exotic plant pests and weeds and to input surveillance data into a national computer-based system known as the National Agricultural Plant Information System (NAPIS).

Need and Use of the Information: APHIS collects information using cooperative agreements, pest detection surveys, and a Specimens for Determination form (PPQ Form 391), to predict potential plant pest and noxious weed situations and to promptly detect and respond to the occurrence of new pests and to record the location of those pest incursions that could directly hinder the export of U.S. farm commodities. If the information were not collected, it would seriously impact APHIS' ability to timely assist State personnel, and others involved in agriculture and protection of the environment in order to plan pest control measures, detect new outbreaks, and to determine the threat posed by migratory pests.

Description of Respondents: State, local, or Tribal government.

Number of Respondents: 55.

Frequency of Responses: Reporting; on occasion.

Total Burden Hours: 3,669.
