

investigation was initiated on January 2, 2009 in response to a petition filed on behalf of workers of Lane Home Furnishing (Wren), Tupelo, Mississippi.

The petitioning worker group is included in an earlier petition (TA-W-64,749) filed on December 17, 2008, that is the subject of an ongoing investigation for which a determination has not yet been issued. Further investigation in this case would duplicate efforts and serve no purpose; therefore the investigation under this petition has been terminated.

Signed at Washington, DC this 16th day of January 2009.

SUPPLEMENTARY INFORMATION:

I. Background

Section 101(c) of the Federal Mine Safety and Health Act of 1977 (Mine Act) allows the mine operator or representative of miners to file a petition to modify the application of any mandatory safety standard to a coal or other mine if the Secretary determines that: (1) An alternative method of achieving the result of such standard exists which will at all times guarantee no less than the same measure of

protection afforded the miners of such mine by such standard; or (2) that the application of such standard to such mine will result in a diminution of safety to the miners in such mine. In addition, the regulations at 30 CFR §§ 44.10 and 44.11 establish the requirements and procedures for filing petitions for modification.

II. Petitions for Modification

Docket Number: M-2008-054-C.
Petitioner: Parkwood Resources, Inc., 511 Railroad Avenue, Homer City, Pennsylvania 15748.

Mine: Cherry Tree Mine, MSHA I.D. No. 36-090224, located in Clearfield County, Pennsylvania.

Regulation Affected: 30 CFR 75.500(d) (Permissible electric equipment).

Modification Request: The petitioner requests a modification of the existing standard to permit an alternative method of compliance to use battery-powered non-permissible surveying equipment, including, but not limited to, portable battery operated mine transits, total station surveying equipment, distance meters, and laptop computers, in or inby the last open crosscut. The petitioner proposes to: (1) Use non-permissible electronic surveying equipment in or inby the last open crosscut and examine the equipment prior to use to ensure that the equipment is in safe operating condition; (2) have a qualified person examine the equipment at intervals not to exceed 7 days and record the examination results in the weekly electrical equipment examination book. The examination will include: (i) Checking the instrument for any physical damage and the integrity of the case; (ii) removing the battery and inspecting for corrosion; (iii) inspecting the contact points to ensure a secure connection to the battery; (iv) reinserting the battery and powering up and shutting down to ensure proper connections; and (v) checking the battery compartment cover to ensure that it is securely fastened. In addition, the operator will also (1) have a qualified person continuously monitor for methane immediately before and during the use of non-permissible surveying equipment in or inby the last open crosscut or in the return; (2) eliminate the use of non-permissible surveying equipment if methane is detected in concentrations at or above 1.0 percent methane; (3) de-energize the equipment immediately and withdraw the equipment outby the last open crosscut when 1.0 percent or more of methane is detected while in use; (4) eliminate the use of non-permissible surveying equipment where float coal
