Title: 49 U.S.C. Section 5310-Enhanced Mobility of Seniors and Individuals with Disabilities & Section 5311-Nonurbanized Area Formula Program.

OMB Number: 2132–0500.

Background: 49 U.S.C. 5310-Enhanced Mobility of Seniors and Individuals with Disabilities Program provides formula funding to states and designated recipients to meet the transportation needs of older adults and people with disabilities when the transportation service provided is unavailable, insufficient, or inappropriate to meeting these needs. Funds are apportioned based on each state's share of the population for these two groups. Formula funds are apportioned to designated recipients; for rural and small urban areas, this is the state Department of Transportation or a local government entity that operates a public transportation service, while in large urban areas, a designated recipient is chosen by the governor. Designated recipients have flexibility in how they select subrecipient projects for funding, but their decision process must be clearly noted in a state/program management plan. The selection process may be formula-based, competitive or discretionary, and subrecipients can include states or local government authorities, private non-profit organizations, and/or operators of public transportation.

The program aims to improve mobility for older adults and people with disabilities by removing barriers to transportation service and expanding transportation mobility options. This program supports transportation services planned, designed, and carried

out to meet the special transportation needs of seniors and individuals with disabilities in all areas—large urbanized (over 200,000), small urbanized (50,000–200,000), and rural (under 50,000). Eligible projects include both “traditional” capital investment and “nontraditional” capital or operating investment beyond the Americans with Disabilities Act (ADA) complementary paratransit services.

49 U.S.C. 5311—Formula Grants for Rural Areas Program provides capital, planning, and operating assistance to states to support public transportation in rural areas with populations of less than 50,000, where many residents often rely on public transit to reach their destinations. The program also provides funding for state and national training and technical assistance through the Rural Transportation Assistance Program. Eligible direct recipients are States and Indian Tribes. Eligible subrecipients include states and local governmental authorities, nonprofit organizations, and operators of public transportation or intercity bus service. The Tribal Transit program provides funding directly to federally recognized Indian Tribes for capital, operating, and planning purposes, through a formula and a competitive program.

Respondents: States or local governmental entities that operate a public transportation service, federally recognized Indian Tribes, and designated recipients; or eligible subrecipients.

Estimated Annual Number of Respondents: 517 respondents.

Estimated Total Annual Burden: 54,133 hours.

Frequency: Annual.

Title: National Transit Asset Management (TAM) System.

OMB Number: 2132–0579.

Background: Transit Asset Management (TAM) is a business model that prioritizes funding based on the condition of transit assets to achieve and maintain a state of good repair for the nation’s public transportation assets. The TAM program enables transit agencies to implement strategic approaches to monitoring, maintaining, and replacing transit assets. Federal requirements for transit asset management applies to all recipients and sub-recipients of Chapter 53 funds that own, operate, or manage public transportation capital assets. It is a framework for transit agencies to monitor and manage public transportation assets, improve safety,
