Also included is Tactical Aviation Ground Munition Program Office Technical Assistance; Security Assistance Management Directorate, Joint Attack Munition Systems Technical Assistance; classified and unclassified publications; spare parts; repair and return; storage; and other related elements of program and logistical support. This proposed sale will support the foreign policy and national security objectives of the United States. Australia is one of our most important allies in the Western Pacific. The strategic location of this political and economic power contributes significantly to ensuring peace and economic stability in the region. It is vital to the U.S. national interest to assist our ally in developing and maintaining a strong and ready self-defense capability.

This proposed sale will improve Australia's capability to meet current and future threats by enhancing the Australian Navy's armed reconnaissance and anti-tank warfare mission capabilities. Australia will have no

difficulty absorbing these missiles into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractor will be Lockheed Martin Corporation, Orlando, Florida. The purchaser typically requests offsets. Any offset agreement will be defined in negotiations between the purchaser and the contractor.

Implementation of this proposed sale will not require the assignment of any U.S. Government or contractor representatives. There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 21-60

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex

Item No. vii

(vii) *Sensitivity of Technology:*

1. The Hellfire AGM-114R2 is a precision strike, semi-active laser-guided missile and is the principal air-to-ground weapon for the U.S. Army AH-64 Apache. The Hellfire R model incorporates a multi-purpose warhead with selectable effects appropriate for engagement of a wide range of targets including heavily or lightly armored targets, thin-skinned vehicles, urban structures, caves, and personnel.

2. The highest level of classification of defense articles, components, and services included in this potential sale is SECRET.

3. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures that might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.

4. A determination has been made that the Government of Australia can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.

5. All defense articles and services listed in this transmittal are authorized for release and export to the Government of Australia.
