

Burlington, Massachusetts 01803. Telephone (781) 238-7613. Email: richard.doucette@faa.gov. Documents reflecting this FAA action may be obtained from the same individual. The Noise Compatibility Plan and supporting information can also be found at www.btvsound.com.

SUPPLEMENTARY INFORMATION: This notice announces that the FAA has given its overall approval to the Burlington International Airport noise compatibility program, effective October 14, 2020.

Under Section 104 (a) of the Aviation Safety and Noise Abatement Act of 1979 (hereinafter the Act), an airport operator who has previously submitted a noise exposure map may submit to the FAA a noise compatibility program which sets forth the measures taken or proposed by the airport operator for the reduction of existing non-compatible land uses and prevention of additional non-compatible land uses within the area covered by the noise exposure maps.

The Act requires such programs to be developed in consultation with interested and affected parties including local communities, government agencies, airport users, and FAA personnel.

Each airport noise compatibility program developed in accordance with 14 CFR part 150 is a local program, not a federal program. The FAA does not substitute its judgment for that of the airport proprietor with respect to which measures should be recommended for action. The FAA's approval or disapproval of the Part 150 program recommendations is measured according to the standards expressed in Part 150 and the Act, and is limited to the following determinations:

(a) The noise compatibility program was developed in accordance with the provisions and procedures of FAR Part 150;

(b) Program measures are reasonably consistent with achieving the goals of reducing existing non-compatible land uses around the airport and preventing the introduction of additional non-compatible land uses;

(c) Program measures would not create an undue burden on interstate or foreign commerce, unjustly discriminate against types or classes of aeronautical uses, violate the terms of airport grant agreements, or intrude into areas preempted by the federal government; and

(d) Program measures relating to the use of flight procedures can be implemented within the period covered by the program without derogating

safety, adversely affecting the efficient use and management of the navigable airspace and air traffic control systems, or adversely affecting other powers and responsibilities of the Administrator as prescribed by law.

Specific limitations with respect to FAA's approval of an airport noise compatibility program are delineated in Part 150, Section 150.5. Approval is not a determination concerning the acceptability of land uses under Federal, state, or local law. Approval does not by itself constitute a FAA implementing action. A request for Federal action or approval to implement specific noise compatibility measures may be required, and an FAA decision on the request may require an environmental assessment of the proposed action.

Approval does not constitute a commitment by the FAA to financially assist in the implementation of the program nor a determination that all measures covered by the program are eligible for grant-in-aid funding from the FAA under the Airport and Airway Improvement Act of 1982. Where Federal funding is sought, requests for project grants must be submitted to the FAA Regional Office in Burlington, Massachusetts.

The Burlington International Airport study contains a proposed noise compatibility program comprised of actions designed for implementation by airport management and adjacent jurisdictions. The Burlington International Airport, South Burlington, Vermont requested that the FAA evaluate and approve this material as a noise compatibility program as described in Section 104(b) of the Act. The FAA began its review of the program on April 15, 2020, and was required by a provision of the Act to approve or disapprove the program within 180 days (other than the use of new flight procedures for noise control). Failure to approve or disapprove such a program within the 180-day period shall be deemed to be an approval of such a program.

The submitted program contained 9 noise mitigation measures, including 2 to be removed. The FAA completed its review and determined that the procedural and substantive requirements of the Act and Part 150 have been satisfied. All 7 recommended measures were approved, and 2 recommended for removal were approved for removal. The new program will de-emphasize land acquisition in lieu of sound insulation, as the primary noise mitigation measure.

The Airports Division originally approved the program on August 27, 2020. After issuance of the Record of

Approval, the FAA discussed its implementation with the City of Burlington. Based on this discussion, the FAA made two small revisions to the Record of Approval and issued a revised approval on October 14, 2020. These revisions clarify FAA funding of the Purchase Assurance and Sales Assistance programs (measures #6 and #7). That prior approval is superseded by issuance of a new Record of Approval on October 14, 2020.

FAA's determinations are set forth in detail in a Record of Approval approved on October 14, 2020. The Record of Approval, as well as other evaluation materials and the documents comprising the submittal, are available for review at the FAA office listed above and at the administrative offices of Burlington International Airport, South Burlington, Vermont.

Issued in Burlington, Massachusetts, on October 14, 2020.

Julie Seltsam-Wilps,

Airports Division Deputy Director, FAA New England Region.

BILLING CODE 4910-13-P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[Docket No. FAA-2020-0993]

Agency Information Collection Activities: Requests for Comments; Clearance of Renewed; Approval of Information Collection: General Aviation and Part 135 Activity Survey

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice and request for comments.

SUMMARY: The FAA's primary requirement is for annual hours flown, optimal determination of sample size is based on flight time variation by state and aircraft type, and a sampling fraction is determined for each cell with a no-zero population. Sample units are selected randomly within each stratum. Respondents to this survey are owners of general aviation aircraft.

This information is used by FAA, NTSB, and other government agencies, the aviation industry, and others for safety assessment, planning, forecasting, cost/benefit analysis, and to target areas for research.

DATES: Written comments should be submitted by January 11, 2021.

ADDRESSES: Please send written comments:

By *Electronic Docket*:
www.regulations.gov (Enter docket
 number into search field).

By *mail*: N/A.

By *fax*: N/A.

[Shane Bertish] by email at:
Shane.Bertish@faa.gov; phone: N/A.

SUPPLEMENTARY INFORMATION:

Public Comments Invited: You are asked to comment on any aspect of this information collection, including (a) Whether the proposed collection of information is necessary for FAA's performance; (b) the accuracy of the estimated burden; (c) ways for FAA to enhance the quality, utility and clarity of the information collection; and (d) ways that the burden could be minimized without reducing the quality of the collected information. The agency will summarize and/or include your comments in the request for OMB's clearance of this information collection.

OMB Control Number: 2120-6160.

Title: General Aviation and Part 135 Activity Survey.

Form Numbers: 1800-54.

Type of Review: Renewal.

Background: Title 49, United States Code, empowers the Secretary of Transportation to collect and disseminate information relative to civil aeronautics, to study the possibilities for development of air commerce and the aeronautical industries, and to make long-range plans for, and formulate policy with respect to, the orderly development and use of the navigable airspace, radar installations and all other aids for air navigation. These data are necessary to assess performance of the Department of Transportation in meeting the strategic goal for General Aviation safety as described in the Destination 2025 Strategic Plan.

The agency and the National Transportation Safety Board (NTSB) use the exposure data, both by itself and in conjunction with aircraft age, to calculate accident rates, which are used to compare safety over time and safety performance among different aircraft types and configurations.

The agency and the NTSB will use the exposure data for public use aircraft to calculate accident rates for those aircraft. The NTSB is now required to investigate accidents involving public use aircraft. This is a responsibility assigned by Public Law 103-411.

Respondents: Owners of general aviation aircraft.

Frequency: Annual.

Estimated Average Burden per Response: 20 minutes.

Estimated Total Annual Burden: 39,000 responses; 13,000 hours.

Issued in Washington, DC, on November 4, 2020.

Parasha Vincent Flowers,

Program Manager, Program Management & Development Branch, AVP-220, Office of Accident Investigation & Prevention.

BILLING CODE 4910-13-P

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

[Docket No. FRA-2020-0027-N-30]

Proposed Agency Information Collection Activities; Comment Request

AGENCY: Federal Railroad Administration (FRA), Department of Transportation (DOT).

ACTION: Notice of information collection; request for comment.

SUMMARY: Under the Paperwork Reduction Act of 1995 (PRA) and its implementing regulations, this notice announces that FRA is forwarding the Information Collection Request (ICR) abstracted below to the Office of Management and Budget (OMB) for review and comment. The ICR describes the information collection and its expected burden. On August 24, 2020, FRA published a notice providing a 60-day period for public comment on the ICR.

DATES: Interested persons are invited to submit comments on or before December 10, 2020.

ADDRESSES: Written comments and recommendations for the proposed ICR should be sent within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find the particular ICR by selecting "Currently under 30-day Review—Open for Public Comments" or by using the search function.

FOR FURTHER INFORMATION CONTACT: Ms. Hodan Wells, Information Collection Clearance Officer, Office of Railroad Safety, Regulatory Analysis Division, Federal Railroad Administration, telephone (202) 493-0440, email: Hodan.Wells@dot.gov.

SUPPLEMENTARY INFORMATION: The PRA, 44 U.S.C. 3501-3520, and its implementing regulations, 5 CFR part 1320, require Federal agencies to issue two notices seeking public comment on information collection activities before OMB may approve paperwork packages. See 44 U.S.C. 3506, 3507; 5 CFR 1320.8 through 1320.12. On August 24, 2020, FRA published a 60-day notice in the **Federal Register** soliciting comment on

the ICR for which it is now seeking OMB approval. See 85 FR 52190. FRA received no comments related to the proposed collection of information.

Before OMB decides whether to approve the proposed collection of information, it must provide 30 days for public comment. Federal law requires OMB to approve or disapprove paperwork packages between 30 and 60 days after the 30-day notice is published. 44 U.S.C. 3507(b)-(c); 5 CFR 1320.12(d); see also 60 FR 44978, 44983, Aug. 29, 1995. OMB believes the 30-day notice informs the regulated community to file relevant comments and affords the agency adequate time to digest public comments before it renders a decision. 60 FR 44983, Aug. 29, 1995. Therefore, respondents should submit their respective comments to OMB within 30 days of publication to best ensure having their full effect.

Comments are invited on the following ICR regarding: (1) Whether the information collection activities are necessary for FRA to properly execute its functions, including whether the information will have practical utility; (2) the accuracy of FRA's estimates of the burden of the information collection activities, including the validity of the methodology and assumptions used to determine the estimates; (3) ways for FRA to enhance the quality, utility, and clarity of the information being collected; and (4) ways to minimize the burden of information collection activities on the public, including the use of automated collection techniques or other forms of information technology.

The summary below describes the ICR that FRA will submit for OMB clearance as the PRA requires:

Title: Track Safety Standards; Concrete Crossties.

OMB Control Number: 2130-0592.

Abstract: In 2011, FRA mandated specific requirements for effective concrete crossties, for rail fastening systems connected to concrete crossties, and for automated inspections of track constructed with concrete crossties. FRA uses the information collected under 49 CFR 213.234 to ensure automated track inspections of track constructed with concrete crossties are carried out as specified in the rule to supplement visual inspections by Class I and Class II railroads, intercity passenger railroads, and commuter railroads.

Type of Request: Extension with change (revised estimates) of a currently approved collection.

Affected Public: Businesses.

Form(s): N/A.

Respondent Universe: 30 railroads.
