Abstract: The Clean Air Act (the Act) contains several provisions directing EPA to require source owners to conduct monitoring to support certification as to their status of compliance with applicable requirements. These provisions are set forth in Section 504 (operating permits provisions) and Section 114 (enforcement provisions) of the Act. Section 504(b) directs EPA to implement monitoring and certification requirements through the operating permits program. This section allows EPA to prescribe by rule, methods and procedures for determining compliance recognizing that continuous emissions monitoring systems need not be required if other procedures or methods provide sufficiently reliable and timely information for determining compliance. Under section 504(c), each operating permit must "set forth inspection, entry, monitoring, compliance, certification, and reporting requirements to assure compliance with the permit terms and conditions." Section 114(a)(3) requires EPA to promulgate rules for enhanced monitoring and compliance certifications. Section 114(a)(1) of the Act provides additional authority concerning monitoring, reporting, and recordkeeping requirements. This section provides the Administrator with the authority to require any owner or operator of a source to install and operate monitoring systems and to record the resulting monitoring data. EPA promulgated the Compliance Assurance Monitoring (CAM) rule, 40 CFR part 64, on October 22, 1997 (62 FR 54900) to implement these authorities.

In accordance with these provisions, the monitoring information source owners must submit must also be available to the public, except as entitled to protection from disclosure as allowed in section 114(c) of the Act.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 134 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing
