Approved Recovery Plan for the Copperbelly Water Snake Northern Distinct Population Segment

AGENCY: Fish and Wildlife Service,
Interior.

ACTION: Notice of document availability.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), announce the availability of the approved recovery plan for the copperbelly water snake (*Nerodia erythrogaster neglecta*) northern distinct population segment (DPS). The threatened copperbelly water snake northern DPS occurs in Michigan, Ohio, and Indiana. This plan includes specific recovery objectives and criteria to achieve delisting of the species from the Endangered Species Act (Act).

ADDRESSES: You may obtain a copy of the recovery plan by sending a request to Field Supervisor, U.S. Fish and Wildlife Service, Ecological Services Field Office, 2651 Coolidge Road, Suite 101, East Lansing, MI 48823-6316 (printed copies will be available for distribution within 4 to 6 weeks), or download it from the Internet at <http://www.fws.gov/endangered/recovery/index.html#plans>.

FOR FURTHER INFORMATION CONTACT: Ms. Barbara Hosler, at the above address or by telephone at (517) 351-6326. TTY users may contact Ms. Hosler through the Federal Relay Service at (800) 877-8339.

SUPPLEMENTARY INFORMATION:

Background

Recovery of endangered or threatened animals and plants to the point where

they are again secure, self-sustaining members of their ecosystems is a primary goal of our endangered species program. To help guide the recovery effort, we are working to prepare recovery plans for most listed species native to the United States. Recovery plans describe actions considered necessary for the conservation of the species, establish criteria for reclassification or delisting listed species, and estimate time and cost for implementing the measures needed.

The Act (16 U.S.C. 1531 *et seq.*) requires us to develop recovery plans for listed species unless such a plan will not promote the conservation of a particular species. Section 4(f) of the Act, as amended in 1988, requires us to provide the public notice and an opportunity for public review and comment during recovery plan development. We provided the draft copperbelly water snake recovery plan to the public and solicited comments from September 6, 2007, through November 5, 2007 (72 FR 51242). We considered information received during the public comment period and information from peer reviewers in our preparation of the recovery plan, and also summarized that information in Appendix E of this approved recovery plan.

We listed the copperbelly water snake northern DPS as threatened on January 29, 1997 (62 FR 4183). The northern DPS occurs in Michigan, Indiana, and Ohio, north of 40 degrees north latitude. The current distribution of the copperbelly water snake is limited to only five, very small scattered and isolated populations in south central Michigan, northeastern Indiana, and northwestern Ohio. Surveys indicate that the species is in decline throughout these areas.

Copperbelly water snakes have both wetland and terrestrial habitat requirements. The species is associated with wetland complexes characterized by a preponderance of shallow wetlands, many of which draw down seasonally. Such complexes may predominantly occur as isolated wetlands distributed in a forested upland matrix, floodplain wetlands fed by seasonal flooding, or a combination of both. Fishless wetlands, suitable for high anuran (frog and toad) productivity, are required to provide habitat and a suitable prey base.

The copperbelly water snake northern DPS is threatened by habitat loss and fragmentation, human persecution, inadequate habitat management, and road crossings. The principal limiting factor for this species is the availability of wetland/upland habitat complexes of sufficient size. Individuals move hundreds of meters or more between wetlands and routinely use multiple wetlands over the course of an active season. They also spend substantial periods of time in upland habitat aestivating, foraging, and shedding. Populations may require many hundreds of hectares of contiguous habitat in order to persist.

The principal recovery strategy is to establish and conserve multiple wetland/upland habitat complexes that provide adequate habitat for population persistence. The recovery strategy focuses on targeted habitat restoration and implementation of "best management practices" for land managers. The objective of the recovery plan is to provide a framework for the recovery of copperbelly water snake northern DPS so that protection by the Act is no longer necessary. The copperbelly water snake will be considered for delisting when section 4(a)(1) threat factors under the Act are assessed and when the following criteria are met: (1) Multiple population viability is assured; (2) sufficient habitat is conserved and managed; and (3) significant threats due to lack of suitable management, adverse land features and uses, collection, and persecution have been reduced or eliminated.

We will achieve these criteria through the following actions: (1) Identify and conserve habitat complexes sufficient for recovery; (2) monitor known copperbelly water snake populations and their habitat; (3) improve baseline understanding of copperbelly water snake ecology; (4) develop recovery approaches to enhance recruitment and population size; (5) develop and implement public education and outreach efforts; (6) review and track recovery progress; and (7) develop a plan to monitor copperbelly water snake after it is delisted.

Criteria to reclassify the copperbelly water snake northern DPS to endangered status is also provided. The species will be considered for reclassification from threatened to endangered status when section 4(a)(1) threat factors under the Act are assessed

and when either of the following criteria is met: (1) There are no known populations of more than 500 adults, or (2) the cumulative population size is less than 1000 adults.

Authority: Sec. 4(f) of the Endangered Species Act, 16 U.S.C. 1533(f).

Dated: December 5, 2008.

Lynn M. Lewis,

Assistant Regional Director, Ecological Services, Midwest Region.

Alaska Native Claims Selection

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of decision approving lands for conveyance.

SUMMARY: As required by 43 CFR 2650.7(d), notice is hereby given that an appealable decision approving lands for conveyance pursuant to the Alaska Native Claims Settlement Act will be issued to Bering Straits Native Corporation for lands located in the vicinity of Council and Elim, Alaska. Notice of the decision will also be published four times in the Nome Nugget.

DATES: The time limits for filing an appeal are:

1. Any party claiming a property interest which is adversely affected by the decision shall have until January 22, 2009 to file an appeal.

2. Parties receiving service of the decision by certified mail shall have 30 days from the date of receipt to file an appeal.

Parties who do not file an appeal in accordance with the requirements of 43 CFR Part 4, Subpart E, shall be deemed to have waived their rights.

ADDRESSES: A copy of the decision may be obtained from: Bureau of Land Management, Alaska State Office, 222 West Seventh Avenue, #13, Anchorage, Alaska 99513-7504.

FOR FURTHER INFORMATION CONTACT: The Bureau of Land Management by phone at 907-271-5960, or by e-mail at ak.blm.conveyance@ak.blm.gov. Persons who use a telecommunication device (TTD) may call the Federal Information Relay Service (FIRS) at 1-800-877-8330, 24 hours a day, seven days a

week, to contact the Bureau of Land Management.

Call for Nominations for the Bureau of Land Management's Carrizo Plain National Monument Advisory Council

AGENCY: Bureau of Land Management, Interior.

ACTION: Call for nominations.

SUMMARY: The Bureau of Land Management (BLM) is soliciting nominations from the public to fill positions on the Carrizo Plain National Monument Advisory Committee. Committee members provide advice and recommendations to the BLM on the management of public lands in the Carrizo Plain National Monument.

ADDRESSES: Nominations should be sent to the Monument Manager, Bureau of Land Management, Bakersfield Field Office, 3801 Pegasus Drive, Bakersfield, CA 93308.

FOR FURTHER INFORMATION CONTACT:

Johna Hurl, Monument Manager, Bakersfield Field Office, 3801 Pegasus Drive, Bakersfield, CA 93308, (661) 391-6093, Johna_Hurl@ca.blm.gov.

SUPPLEMENTARY INFORMATION: The Monument Advisory Committee provides representative citizen counsel and advice to the Secretary of the Interior through the BLM with respect to the revision and implementation of the comprehensive plan for the Carrizo Plain National Monument.

The Committee consists of nine members:

(1) A member of, or nominated by, the San Luis Obispo Board of Supervisors.

(2) A member of, or nominated by, the Kern County Board of Supervisors.

(3) A member of, or nominated by, the Carrizo Native American Advisory Council.

(4) A member of, or nominated by, the Central California Resource Advisory Council.

(5) A member representing individuals or companies authorized to graze livestock within the Monument.

(6) Four members with recognized backgrounds reflecting:

(i) The purposes for which the Monument was established; and

(ii) The interests of other stakeholders, including the general public, that are affected by or interested in the planning and management of the Monument.

Terms of all present committee members expire on February 1, 2009. In order to provide continuity, BLM will transition to three-year terms, with
