

participate in 2007 and any that are new since then. All birth centers and hospitals with ≥ 1 registered maternity bed will be screened via a brief phone call to assess their eligibility, identify additional locations, and identify the appropriate point of contact. The extremely high response rate to the 2007 mPINC survey of 82 percent indicates that the methodology is appropriate and

also reflects unusually high interest among the study population.

As with the initial survey, a major goal of the 2009 follow-up survey is to be fully responsive to their needs for information and technical assistance. CDC will provide direct feedback to respondents in a customized benchmark report of their results and identify and document progress since 2007 on their

quality improvement efforts. National and state reports will use de-identified data to describe incremental changes in practices and care processes over time at the facility, state, and national levels.

Participation in the survey is voluntary, and responses may be submitted by mail or through a web-based system. There are no costs to respondents other than their time.
