Comments submitted in response to this notice may be made available to the public through [regulations.gov](https://www.regulations.gov). For this reason, please do not include in your comments information of a confidential nature, such as sensitive personal information or proprietary information. If you send an email comment, your email address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the internet. Please note that responses to this public comment request containing

any routine notice about the confidentiality of the communication will be treated as public comment that may be made available to the public, notwithstanding the inclusion of the routine notice.

FOR FURTHER INFORMATION CONTACT:

Melissa Gouge, 202–606–6736, or by email at mougouge@cns.gov.

SUPPLEMENTARY INFORMATION:

Title of Collection: NCCC Impact Evaluation.

OMB Control Number: 3045–0189.

Type of Review: Renewal.

Respondents/Affected Public:

Individuals and Households; Businesses and Organizations.

Total Estimated Number of Additional Responses: 210.

Total Estimated Number of Additional Burden Hours: 305.

Abstract: AmeriCorps NCCC program members have been a crucial part of AmeriCorps' COVID–19 pandemic response, serving as personnel on vaccine distribution mission assignments alongside FEMA and other agencies. No one could have anticipated the COVID–19 pandemic, but we have seized an opportunity to develop questions that build on the existing study but are specific to these ongoing activities.

These activities are an essential element of our agency's COVID–19 pandemic response—one that is also essential to our mission—to improve lives and strengthen communities. To further our mission in a time of increasing uncertainty, we aim to collect information on current activity that must be measured now in order to assess, identify, and make any identified programmatic changes. Peak performance of these projects is crucial to our agency's COVID–19 pandemic response and public safety writ large.

Vaccine delivery is of increasing importance as the COVID–19 pandemic continues an unpredictable course. In time, we hope, the pandemic will subside, but it is crucial that we analyze these mission assignments now to make improvements that will literally save lives. How will this save lives? Currently, just over 50% of Americans are fully vaccinated against the virus (Source: [CDC.gov](https://www.cdc.gov), accessed 08/20/2021). Vaccines have proven to decrease severity of illness and fatalities from COVID–19. AmeriCorps NCCC members are increasing access to vaccines through their service. Programmatic improvements instituted 'in real time' to enhance their efforts will lead to even greater access and a healthier public.

Comments submitted in response to this notice will be summarized and/or

included in the request for OMB approval. Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; to develop, acquire, install and utilize technology and systems for the purpose of collecting, validating and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information, to search data sources, to complete and review the collection of information; and to transmit or otherwise disclose the information. All written comments will be available for public inspection on [regulations.gov](https://www.regulations.gov).

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP21-44-000]

LA Storage, LLC; Notice of Intent To Prepare an Environmental Impact Statement for the Proposed Hackberry Storage Project, Request for Comments on Environmental Issues, and Schedule for Environmental Review

The staff of the Federal Energy Regulatory Commission (FERC or Commission) will prepare an environmental impact statement (EIS) that will discuss the environmental impacts of the Hackberry Storage Project (Project) involving construction and operation of facilities by LA Storage, LLC (LA Storage) in Cameron and Calcasieu Parishes, Louisiana. The Commission will use the EIS in its decision-making process to determine whether LA Storage's proposed Project is in the public convenience and necessity. The schedule for preparation of the EIS is discussed in the *Schedule for Environmental Review* section of this notice.

As part of the National Environmental Policy Act (NEPA) review process, the Commission takes into account concerns the public may have about proposals and the environmental impacts that could result whenever it considers the issuance of a Certificate of Public Convenience and Necessity. This gathering of public input is referred to as "scoping." By notice issued on October 20, 2020, in Docket No. PF20-5-000, the Commission opened a scoping period during LA Storage's planning process for the Project and prior to filing a formal application with the Commission, a process referred to as "pre-filing." LA Storage has now filed an application with the Commission, and staff intends to prepare an EIS that will address the concerns raised during the pre-filing scoping process as well as comments received in response to this notice. Therefore, the Commission requests comments on potential alternatives and impacts, and any relevant information, studies, or analyses of any kind concerning impacts affecting the quality of the human environment. To ensure that your comments are timely and properly

recorded, please submit your comments so that the Commission receives them in Washington, DC on or before 5:00 p.m. Eastern Time on September 26, 2021. Further details on how to submit comments are provided in the *Public Participation* section of this notice.

As mentioned above, during the pre-filing process, the Commission opened a scoping period which expired on November 19, 2020; however, Commission staff continued to accept comments during the entire pre-filing process. All substantive written and oral comments provided during pre-filing will be considered during the preparation of the EIS. Therefore, if you submitted comments on this Project to the Commission during the pre-filing process in Docket No. PF20-5-000 you do not need to file those comments again.

If you are a landowner receiving this notice, a pipeline company representative may contact you about the acquisition of an easement to construct, operate, and maintain the proposed facilities. The company would seek to negotiate a mutually acceptable easement agreement. You are not required to enter into an agreement. However, if the Commission approves the Project, the Natural Gas Act conveys the right of eminent domain to the company. Therefore, if you and the company do not reach an easement agreement, the pipeline company could initiate condemnation proceedings in court. In such instances, compensation would be determined by a judge in accordance with state law. The Commission does not grant, exercise, or oversee the exercise of eminent domain authority. The courts have exclusive authority to handle eminent domain cases; the Commission has no jurisdiction over these matters.

LA Storage provided landowners with a fact sheet prepared by the FERC entitled "An Interstate Natural Gas Facility On My Land? What Do I Need To Know?" which addresses typically asked questions, including the use of eminent domain and how to participate in the Commission's proceedings. This fact sheet along with other landowner topics of interest are available for viewing on the FERC website (www.ferc.gov) under the Natural Gas Questions or Landowner Topics link.

Public Participation

There are three methods you can use to submit your comments to the Commission. The Commission encourages electronic filing of comments and has staff available to assist you at (866) 208-3676 or FercOnlineSupport@ferc.gov. Please

carefully follow these instructions so that your comments are properly recorded.

(1) You can file your comments electronically using the *eComment* feature, which is located on the Commission's website (www.ferc.gov) under the link to FERC Online. Using eComment is an easy method for submitting brief, text-only comments on a project;

(2) You can file your comments electronically by using the *eFiling* feature, which is located on the Commission's website (www.ferc.gov) under the link to FERC Online. With eFiling, you can provide comments in a variety of formats by attaching them as a file with your submission. New eFiling users must first create an account by clicking on "eRegister." You will be asked to select the type of filing you are making; a comment on a particular project is considered a "Comment on a Filing"; or

(3) You can file a paper copy of your comments by mailing them to the Commission. Be sure to reference the project docket number (CP21-44-000) on your letter. Submissions sent via the U.S. Postal Service must be addressed to: Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Room 1A, Washington, DC 20426. Submissions sent via any other carrier must be addressed to: Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, MD 20852.

Additionally, the Commission offers a free service called eSubscription. This service provides automatic notification of filings made to subscribed dockets, document summaries, and direct links to the documents. Go to <https://www.ferc.gov/ferc-online/overview> to register for eSubscription.

Summary of the Proposed Project, the Project Purpose and Need, and Expected Impacts

The Project would involve the conversion of three existing salt dome caverns to natural gas storage service and the development of one new salt dome cavern for additional natural gas storage service, all within a permanent natural gas storage facility on a 160-acre tract of land owned by LA Storage. In addition to the storage caverns, LA Storage would construct and operate on-site compression facilities (Pelican Compressor Station) and up to six solution mining water supply wells at the storage facility on LA Storage's property; the Hackberry Pipeline, consisting of approximately 11.1 miles of 42-inch-diameter natural gas pipeline connecting the certificated Port Arthur
