Nature and Extent of Confidentiality: Network Outage Reporting System (NORS) outage reports filed with the Commission pursuant to Part 4 of its rules are presumed confidential. The information in those filings may be shared with the Department of Homeland Security only under appropriate confidential disclosure provisions. Other persons seeking disclosure must follow the procedures delineated in 47 CFR 0.457 and 0.459 of the Commission's rules for requests for and disclosure of information. The revisions to this information collection require information to be transmitted to third parties, not to the FCC. Accordingly, the Commission cannot, and does not, guarantee confidentiality of information provided directly to public safety answering points (PSAPs). The revisions do not affect the confidential treatment of information provided directly to the FCC through NORS.

Needs and Uses: The Commission is seeking OMB approval for a revision of this information collection in order to obtain the full three year approval from OMB. The Commission is reporting a 223-hour increase in its previous annual burden estimates. The increase is due to adoption of FCC 13–158, a Report and Order establishing more specific outage notification obligations for Covered 911 Service Providers, which are the respondents subject to the revised requirements of this information collection.

Previous FCC rules required certain communications providers to notify PSAPs of 911 outages “as soon as possible” with “all available information that may be useful.” The

revisions to this information collection respond to the derecho storm that struck the Midwest and Mid-Atlantic United States in June 2012, causing significant disruptions in 911 service. Through its inquiry into these 911 outages, the Commission learned that many PSAPs' efforts to restore service were complicated by inadequate information and ineffective communication by 911 service providers. Consequently, the Commission amended section 4.9 of its rules to require more specific 911 outage notifications to PSAPs within specified time periods.

Under the new rule, Covered 911 Service Providers must notify PSAPs of outages that potentially affect 911 service within 30 minutes of discovering the outage and provide contact information such as a name, telephone number, and email for follow-up. Whenever additional material information becomes available, but no later than two hours after the initial contact, the Covered 911 Service Provider must communicate additional detail to the PSAP, including the nature of the outage, its best-known cause, the geographic scope of the outage, and the estimated time for repairs. Notifications must be transmitted by telephone and in writing via electronic means, unless the PSAP and service provider have agreed in advance to an alternative method. The new requirements apply only to entities defined as Covered 911 Service Providers under 47 CFR 12.4(a)(4), and outage reporting obligations for other entities remain unchanged.

The above revisions do not require information to be submitted to the FCC, but rather to third parties (*i.e.*, PSAPs and other “911 special facilities”) that experience 911 outages. While the amended rule will not result in new or different information submitted to the Commission, it will require Covered 911 Service Providers to transmit more specific information to PSAPs to improve their situational awareness and ability to respond to 911 outages. Such notifications are necessary because PSAP personnel depend on reliable 911 service to answer emergency calls and dispatch help when needed. When 911 service is compromised, PSAPs require prompt notification and useful information about the outage so that they may make alternate plans to reroute calls until service is restored. Many Covered 911 Service Providers indicate that they already collect the required outage information for internal use, and for submission to the FCC through required NORS reports. Therefore, the obligation to provide more specific outage notifications to PSAPs will not generally require

collection of new or different information, only a more consistent effort to ensure that transmission of such information is timely and complete. These revisions do not affect the obligation to submit NORS outage reports to the FCC or the information that must be provided in NORS reports; these portions of the information collection have already been approved by OMB and have not changed since that approval.

Needs and Uses: On August 9, 2013, the Federal Communications Commission (Commission) released a Report and Order (R&O) titled, "In the Comprehensive Review of Licensing and Operating Rules for Satellite Services." FCC 13-111. In this R&O, the Commission adopted comprehensive changes to Part 25 of the Commission's rules, which governs licensing and operation of space stations and earth stations for the provision of satellite communication services. Many of the amendments are substantive changes intended to afford licensees as much operational flexibility as possible consistent with minimizing harmful interference and easing administrative burdens on licensees, applicants, and the Commission. Additionally, this information collection is revised by incorporating existing separate information collection requirements under Part 25 into this information collection. Specifically, the revision of OMB Control No. 3060-0678 (Part 25 of the Commission's Rules) will consolidate information collections that are currently under OMB Control Nos. 3060-0768 (28 GHz Band Segmentation Plan), 3060-0955 (2 GHz Mobile Satellite Service Reports), 3060-0962 (Redesignation of the 18 GHz Band), 3060-0994 (Flexibility for Delivery of Communications by MSS Providers), 3060-1013 (Mitigation of Orbital Debris), 3060-1014 (Ku-band NGSO FSS), 3060-1059 (Global Mobile Personal Communications by Satellite (GMPCS)/E911 Call Centers), 3060-1061 (Earth Stations on Board Vessels (ESVs)), 3060-1066 (Renewal of Application for Satellite Space and Earth Station Authorization), 3060-1067 (Qualification Questions), 3060-1095 (Surrenders of Authorizations), 3060-1097 (Rules for Broadcasting Satellite Service), 3060-1106 (Vehicle Mounted Earth Stations (VMES)), 3060-1108 (Consummation of Assignments and Transfers of Control), 3060-1153 (Satellite Digital Radio Service (SDARS)), and 3060-1187 (Earth Stations Aboard Aircraft (ESAA)). Therefore, the number of respondents, number of responses, annual burden hours and annual costs have been amended from the previous submission
