

B. Overutilization for commercial, recreational, scientific, or educational purposes;

C. Disease or predation;

D. The inadequacy of existing regulatory mechanisms; or

E. Other natural or manmade factors affecting its continued existence.

Section 4(a)(1) of the Act requires that our determination be made on the basis of the best scientific and commercial data available.

What could happen as a result of this review?

If we find that there is new information concerning any of the 23 species listed in Table 1 indicating a change in classification may be warranted, we may propose a new rule that could do one of the following: (a) Reclassify the species from endangered to threatened; (b) reclassify the species from threatened to endangered; or (c) remove the species from the List. If we determine that a change in classification is not warranted, then these species will remain on the List under their current status.
