Title: Vehicle Service Information Web Site Audit.

Abstract: EPA finalized regulations in June of 2003 (68 *FR* 38427; June 27, 2003) requiring auto manufacturers to

launch full text Web sites containing all required service information for 1996 and later model years. In order to assess the effectiveness of the web site provisions of the regulations, EPA believes that input from independent technicians must be of primary consideration. As part of our broader efforts to evaluate the OEM web sites, EPA is initiating a process to gather feedback directly from the technician community on their experiences with the web sites and to communicate those findings directly to the OEMs and the service industry as a whole. EPA staff will use this data in conjunction with other internal analyses to assess the effectiveness of the service information web sites that are required by the regulations. In addition, this information will be used by the Agency to determine if manufacturer guidance or changes to the regulations are needed. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in 40 CFR are listed in 40 CFR part 9.

The EPA would like to solicit comments to:

- (i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;
- (ii) evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- (iii) enhance the quality, utility, and clarity of the information to be collected; and
- (iv) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Burden Statement: Participation in the audit requires the availability of desk top or lap top computers in the maintenance facility or shop. In addition, internet access is needed in the facility in order to access the information on individual automobile manufacturer Web sites. It is anticipated that a vast majority of vehicle repair facilities have already made these capital investments for the day to day operations of their businesses and that no additional costs will be incurred by technicians who participate in the audit. In addition, the automobile

manufacturers have agreed to arrange for free access to all their Web sites for participants for the 3–4 month duration of the audit. Therefore, participants will not incur any additional charges or fees as a result of participating in the audit. EPA otherwise anticipates approximately 250 technicians to and that they will spend approximately 1–2 hours per week over a 12-week time period to electronically complete and return short audit questionnaires. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Dated: April 18, 2005.

Karl Simon,

Acting Director, Office of Transportation and Air Quality.
