[Docket No. NHTSA-2013-0073]

Preliminary Theft Data; Motor Vehicle Theft Prevention Standard

AGENCY: National Highway Traffic Safety Administration (NHTSA), Department of Transportation.

ACTION: Publication of preliminary theft data; request for comments.

SUMMARY: This document requests comments on data about passenger motor vehicle thefts that occurred in calendar year (CY) 2011, including theft rates for existing passenger motor

vehicle lines manufactured in model year (MY) 2011. The preliminary theft data indicate that the vehicle theft rate for CY/MY 2011 vehicles (0.10 thefts per thousand vehicles) significantly decreased by 91.45 percent from the theft rate for CY/MY 2010 vehicles (1.17 thefts per thousand vehicles).

Publication of these data fulfills NHTSA's statutory obligation to periodically obtain accurate and timely theft data, and publish the information for review and comment.

DATES: Comments must be submitted on or before September 9, 2013.

SUPPLEMENTARY INFORMATION: NHTSA administers a program for reducing motor vehicle theft. The central feature of this program is the Federal Motor Vehicle Theft Prevention Standard, 49 CFR Part 541. The standard specifies performance requirements for inscribing or affixing vehicle identification numbers (VINs) onto certain major original equipment and replacement parts of high-theft lines of passenger motor vehicles.

The agency is required by 49 U.S.C. 33104(b)(4) to periodically obtain, from the most reliable source, accurate and timely theft data, and publish the data for review and comment. To fulfill the section 33104(b)(4) mandate, this document reports the preliminary theft data for CY 2010 the most recent calendar year for which data are available.

In calculating the 2011 theft rates, NHTSA followed the same procedures it has used since publication of the 1983/1984 theft rate data (50 FR 46669, November 12, 1985). The 2011 theft rate for each vehicle line was calculated by

dividing the number of reported thefts of MY 2011 vehicles of that line stolen during calendar year 2011 by the total number of vehicles in that line manufactured for MY 2011, as reported to the Environmental Protection Agency (EPA). As in all previous reports, NHTSA's data were based on information provided to NHTSA by the National Crime Information Center (NCIC) of the Federal Bureau of Investigation. The NCIC is a government system that receives vehicle theft information from approximately 23,000 criminal justice agencies and other law enforcement authorities throughout the United States. The NCIC data also include reported thefts of self-insured and uninsured vehicles, not all of which are reported to other data sources.

The preliminary 2011 theft data show a significant decrease in the vehicle theft rate when compared to the theft rate experienced in CY/MY 2010 (For 2010 theft data, see 77 FR 58500, September 21, 2012). The preliminary theft rate for MY 2011 passenger vehicles stolen in calendar year 2011 decreased to 0.10 thefts per thousand vehicles produced, a decrease of 91.45

percent from the rate of 1.17 thefts per thousand vehicles experienced by MY vehicles in CY 2010. For MY 2011 vehicles, out of a total of 226 vehicle lines, four lines had a theft rate higher than 3.5826 per thousand vehicles, the established median theft rate for MYs 1990/1991 (See 59 FR 12400, March 16, 1994). Of the four vehicle lines with a theft rate higher than 3.5826, four are passenger car lines, none are multipurpose passenger vehicle lines, and none are light-duty truck lines.

The agency believes that the theft rate reduction is a result of several factors, including vehicle parts marking; the increased use of standard antitheft devices and other advances in electronic technology (i.e., immobilizers) and theft prevention methods; increased and improved prosecution efforts by law enforcement organizations; and, increased public awareness which may have contributed to the overall reduction in vehicle thefts. The preliminary MY 2011 theft rate reduction is consistent with the general decreasing trend of theft rates over the past 19 years as indicated by Figure 1.

Figure 1: Theft Rate Data Trend (1993-2011)

Theft rate per thousand vehicles produced

In Table I, NHTSA has tentatively ranked each of the MY 2011 vehicle lines in descending order of theft rate. Public comment is sought on the accuracy of the data, including the data for the production volumes of individual vehicle lines.

Comments must not exceed 15 pages in length (49 CFR 553.21). Attachments may be appended to these submissions without regard to the 15 page limit. This limitation is intended to encourage commenters to detail their primary arguments in a concise fashion.

If a commenter wishes to submit certain information under a claim of confidentiality, three copies of the complete submission, including purportedly confidential business information, should be submitted to the Chief Counsel, NHTSA, at the street address given in the **FOR FURTHER INFORMATION CONTACT** section, and two copies from which the purportedly

confidential information has been deleted should be submitted to the docket. A request for confidentiality should be accompanied by a cover letter setting forth the information specified in the agency's confidential business information regulation. 49 CFR part 512.

All comments received before the close of business on the comment closing date indicated above for this document will be considered, and will be available for examination in the docket at the above address both before and after that date. To the extent possible, comments filed after the closing date will also be considered. Comments on this document will be available for inspection in the docket. NHTSA will continue to file relevant information as it becomes available for inspection in the docket after the closing date, and it is recommended that interested persons continue to examine the docket for new material.

Those persons desiring to be notified upon receipt of their comments in the rules docket should enclose a self-addressed, stamped postcard in the envelope with their comments. Upon receiving the comments, the docket supervisor will return the postcard by mail.

Privacy Act: Anyone is able to search the electronic form of all comments received into any of our dockets by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, etc.). You may review DOT's complete Privacy Act Statement in the **Federal Register** published on April 11, 2000 (Volume 65, Number 70; Pages 19477-78) or you may visit <http://DocketsInfo.dot.gov>.

Authority: 49 U.S.C. 33101, 33102 and 33104; delegation of authority at 49 CFR 1.50.
