SUPPLEMENTARY INFORMATION: In order to ensure full and meaningful public participation, this notice invites public comments to be submitted under the PRA about proposed updates to the Claim Adjudication Process for Alleged Presence of Pneumoconiosis information collection. Specifically, in a Notice of Proposed Rulemaking (NPRM) published in the **Federal Register** on June 13, 2013 (78 FR 35575), the DOL proposed both updates to its existing analog film radiograph standards and new parallel standards for digital radiographs applicable to claims filed under the Black Lung Benefits Act, as amended, 30 U.S.C. 901 et seq. If adopted in final, physicians obtaining x-rays of miners on digital radiography systems would submit the radiograph to the DOL in an electronic format. The DOL is incorporating this format change into the existing approved information collection. The DOL believes the NPRM would not impose a new information collection, change the actual data collected, or the estimated information collection (paperwork) burdens imposed on the public; however, the additional format option could be considered a change to the existing information collection, as currently approved under the PRA.

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is approved by the OMB under the PRA and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid Control Number. See 5 CFR 1320.5(a) and 1320.6. The DOL obtains OMB approval for this information collection under Control Number 1240–0023.
