The technology claimed in the issued patent relates to mutated forms of IL-13, either agonists or antagonists, which have higher binding affinity for the IL-13 receptor than does wild-type IL-13. The application also claims therapeutic uses of these mutated forms of IL-13, and their use as targeting moieties.

Applications for a license in the field of use filed in response to this notice will be treated as objections to the grant of the contemplated exclusive license.
