

on a primary basis for Fixed Satellite Service (FSS) and Fixed Service. Domestically, space station operators use the 3.7–4.2 GHz band to provide downlink signals of various bandwidths to licensed transmit-receive, registered receive-only, and unregistered receive-only earth stations throughout the United States. The 3.7 GHz Report and Order calls for the relocation of existing FSS operations in the band into the upper 200 megahertz of the band (4.0–4.2 GHz) and making the lower 280 megahertz (3.7–3.98 GHz) available for flexible-use throughout the contiguous United States through a Commission-administered public auction of overlay licenses in the 3.7 GHz Service that is scheduled to occur later this year, with the 20 megahertz from 3.98–4.0 GHz reserved as a guard band.

The Commission adopted a robust transition schedule to achieve an expeditious relocation of FSS operations and ensure that a significant amount of spectrum is made available quickly for next-generation wireless deployments, while also ensuring effective accommodation of relocated incumbent users. The 3.7 GHz Report and Order establishes a deadline of December 5, 2025, for full relocation to ensure that all FSS operations are cleared in a timely manner, but provides an opportunity for accelerated clearing of the band by allowing incumbent space station operators, as defined in the 3.7 GHz Report and Order, to commit to voluntarily relocate on a two-phased accelerated schedule (with additional obligations and incentives for such operators), with a Phase I deadline of December 5, 2021, and a Phase II deadline of December 5, 2023.

The Commission concluded in the 3.7 GHz Report and Order that, before the public auction of overlay licenses commences, it is appropriate for potential bidders to know when they will get access to the spectrum in the 3.7–3.98 GHz band that is currently occupied by incumbent FSS space station operators and earth stations, as defined in the 3.7 GHz Report and Order, and to have an estimate of how much they may be required to pay for incumbent relocation costs and accelerated relocation payments should they become overlay licensees, as overlay licensees are required to pay for the reasonable relocation costs of incumbent space station and incumbent earth station operators that are required to clear the lower portion of the band.

Under this information collection, the Commission will collect information that will be used by the Commission to determine when, how, and at what cost existing operations in the lower portion

of the 3.7–4.2 GHz band will be relocated to the upper portion of the band. Specifically, the Commission collect the following information from incumbents as adopted in the 3.7 GHz Report and Order:

Accelerated Relocation Elections

The Commission concluded in the 3.7 GHz Report and Order that overlay licensees would only value accelerated relocation if a significant majority of incumbents are cleared in a timely manner, and therefore determined that at least 80% of accelerated relocation payments must be accepted in order for the Commission to accept accelerated elections and require overlay licensees to pay accelerated relocation payments. The 3.7 GHz Report and Order calls for an eligible space station operator, as defined in the 3.7 GHz Report and Order, that chooses to commit to clear on the accelerated schedule in exchange for accelerated relocation payments to submit a written, public, irrevocable accelerated relocation election with the Commission by May 29, 2020, to permit the Commission to determine whether there are sufficient accelerated relocation elections to trigger early relocation and in turn provide bidders with adequate certainty regarding the clearing date and payment obligations associated with each license well in advance of the auction.

Transition Plans

The 3.7 GHz Report and Order requires each eligible space station operator to submit to the Commission by June 12, 2020, and make available for public review, a detailed transition plan describing the necessary steps and estimated costs for the eligible space station operator to complete the transition of existing operations in the lower portion of the 3.7–4.2 GHz band to the upper 200 megahertz of the band and its individual timeline for doing so consistent with the regular relocation deadline or by the accelerated relocation deadlines. An eligible space station operator that elects to receive accelerated relocation payments is responsible for relocating all of its associated incumbent earth stations and must outline the details of such relocation in the transition plan (unless an incumbent earth station owner elects to receive a lump sum payment and assumes responsibility for transitioning its own earth stations). Similarly, an incumbent space station operator that does not elect to receive accelerated relocation payments but nevertheless plans to assume responsibility for relocating its own associated incumbent

earth stations must make that clear in its transition plan.

Incumbent Earth Station Lump Sum Payment Elections

The 3.7 GHz Report and Order provides an incumbent earth station operator with the option of accepting reimbursement payments for its reasonable relocation costs for the transition, or opting out of the formal relocation process and accepting a lump sum reimbursement payment for all of its incumbent earth stations based on the average, estimated costs of relocating all of their incumbent earth stations in lieu of actual relocation costs. The 3.7 GHz Report and Order directs the Wireless Telecommunications Bureau to announce the lump sum that will be available per incumbent earth station as well as the process for electing lump sum payments and requires that no later than 30 days after this announcement, an incumbent earth station operator that wishes to receive a lump sum payment make an irrevocable lump sum payment election that will apply to all of its earth stations in the contiguous United States.

This information collection will serve as the starting point for planning and managing the process of efficiently and expeditiously clearing of the lower portion of the band, so that this spectrum can be auctioned for flexible-use service licenses.

Information Collections Being Reviewed by the Federal Communications Commission

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act (PRA), the Federal Communications Commission (FCC or Commission) invites the general public and other Federal agencies to take this opportunity to comment on the following information collections. Comments are requested concerning:

Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees.

DATES: Written comments should be submitted on or before September 8, 2020. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contacts below as soon as possible.

ADDRESSES: Direct all PRA comments to Cathy Williams, FCC, via email PRA@fcc.gov and to Cathy.Williams@fcc.gov.

FOR FURTHER INFORMATION CONTACT: For additional information about the information collection, contact Cathy Williams at (202) 418-2918.

SUPPLEMENTARY INFORMATION: The FCC may not conduct or sponsor a collection of information unless it displays a currently valid Office of Management and Budget (OMB) control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.

As part of its continuing effort to reduce paperwork burdens, and as required by the PRA of 1995 (44 U.S.C. 3501-3520), the FCC invites the general public and other Federal agencies to take this opportunity to comment on the following information collections. Comments are requested concerning: Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees.

OMB Control Number: 3060-1070.

Title: Allocation and Service Rules for the 71-76 GHz, 81-86 GHz, and 92-95 GHz Bands.

Form Number: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit entities; not-for-profit institutions; and State, local, or Tribal Government.

Number of Respondents: 852 respondents; 11,342 responses.

Estimated Time per Response: 0.25 to 1.5 hours.

Frequency of Response: On occasion reporting requirement, recordkeeping requirement, and third-party disclosure requirement.

Obligation to Respond: Required to obtain or retain benefits. Statutory authority for this information collection is contained in 47 U.S.C. 151, 154(i), 303(f) and (r), 309, 316, and 332 of the Communications Act of 1934, as amended.

Total Annual Burden: 12,039 hours.

Total Annual Cost: \$200,000.

Privacy Impact Assessment: No impact(s).

Nature and Extent of Confidentiality: There is no need for confidentiality. The Commission has not granted assurances of confidentiality to those parties submitting the information. In those cases where a respondent believes information requires confidentiality, the respondent can request confidential treatment and the Commission will afford such confidentiality for 20 days, after which the information will be available to the public.

Needs and Uses: The Commission is seeking an extension of this information collection in order to obtain the full three-year approval from OMB. There are no program changes to the reporting, recordkeeping and/or third-party disclosure requirements, but we are revising estimates based on the reduction of database managers, and the increase of renewals of the nationwide licensees. The recordkeeping, reporting, and third-party disclosure requirements will be used by the Commission to verify licensee compliance with the Commission rules and regulations, and to ensure that licensees continue to fulfill their statutory responsibilities in accordance with the Communications Act of 1934. The Commission's rules promote the private sector development and use of 71-76 GHz, 81-86 GHz, and 92-95 GHz bands (70/80/90 GHz bands). Such information has been used in the past and will continue to be used to minimize interference, verify that applicants are legally and technically qualified to hold license, and to determine compliance with Commission rules.
