SUPPLEMENTARY INFORMATION:

Title: Reporting and Recordkeeping Requirements for Universal Waste Handlers and Destination Facilities (OMB Control Number 2050-0145; ICR Number 1597.04) expiring September 30, 2001. This is a request for extension of a currently approved collection.

Abstract: The universal waste regulations at 40 CFR part 273 were

promulgated by EPA under the authority of Subtitle C in Resource Conservation and Recovery Act (RCRA). This information collection targets the collection of information for the following reporting or recordkeeping requirements: notification, labeling and marking, storage time limitations, off-site shipments, tracking of universal waste shipments, and petitions to include other waste categories at the federal level. It is necessary for EPA to collect universal waste information to ensure that universal waste is collected and managed in a manner that is protective of human health and the environment. EPA requires, among other things, Large Quantity Handlers of Universal Waste (LQHUW) to notify the Agency of their universal waste management activities so that EPA can obtain general information on these handlers, and to facilitate enforcement of the regulations at part 273. In addition, EPA requires universal waste handlers to record the date on which they begin storing universal waste on-site to ensure that such accumulation is performed responsibly. EPA also requires certain universal waste handlers to track receipt of universal waste shipments as well as shipments sent off-site to ensure that universal waste is properly treated, recycled, and disposed. Finally, the submission of petitions in support of regulating other wastes or waste categories under part 273 helps EPA (1) to compile information on these wastes, and (2) to determine whether regulation as a universal waste is appropriate. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR Chapter 15. The **Federal Register** document required under 5 CFR 1320.8(d), soliciting comments on this collection of information was published on March 27, 2001 (66 FR 16672); no comments were received.

Burden Statement: The annual public reporting and record keeping burden for this collection of information in hours per response is estimated to average 1 hour for Small Quantity Handlers of Universal Waste (SQHUW), 3 hours for Large Quantity Handlers of Universal Waste (LQHUW), and 201 hours for destination facilities. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review

instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: SQHUWs, LQHUWs, and Destination Facilities.

Estimated Number of Respondents: 129,839.

Frequency of Response: As needed.

Estimated Total Annual Hour Burden: 218,168 hours.

Estimated Total Annualized Capital, O&M Cost Burden: \$3,317.

Send comments on the Agency's need for this information, the accuracy of the provided burden estimates, and any suggested methods for minimizing respondent burden, including through the use of automated collection techniques to the addresses listed above. Please refer to EPA ICR No. 1597.04 and OMB Control No. 2050-0145 in any correspondence.

Dated: September 13, 2001.

Abstract: Entities potentially affected by this action are portland cement plants with the following facilities: Kilns, clinker coolers, raw mill systems, raw mill dryers, raw material storage, clinker storage, finished product storage, conveyor transfer points, bagging and bulk loading and unloading systems. The Administrator has judged that PM emissions from portland cement plants cause or contribute to air pollution that may reasonably be anticipated to endanger public health or welfare. Owners/operators of portland cement plants must notify EPA of construction, modification, startups, shut downs, date and results of initial performance test and excess emissions. In order to ensure compliance with the standards promulgated to protect public health, adequate reporting and recordkeeping is necessary. In the absence of such information enforcement personnel would be unable to determine whether the standards are being met on a continuous basis, as required by the Clean Air Act. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.
