Title: NSPS for Coal Preparation Plants (40 CFR part 60, subpart Y), OMB Control Number 2060-0122, EPA ICR Number 1062.08. This is a request to renew an existing, approved collection that is scheduled to expire on February 28, 2003. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB.

Abstract: Owners or operators of coal preparation plants must make certain one-time-only notifications including:

Notification of any physical or operational change to an existing facility which may increase the regulated pollutant emission rate, notification of the initial performance test; including information necessary to determine the conditions of the performance test; performance test measurements and results, and notification of demonstration of the continuous monitoring system (CMS). Owners or operators are also required to maintain records of the occurrence and duration of any start-up, shutdown, or malfunction in the operation of an affected facility, or any period during which the CMS is inoperative. CMS requirements specific to coal preparation plants provide information on the operation of the emissions control device and compliance with the opacity standard. Semiannual reports of excess emissions are also required. Any owner or operator subject to the rule shall maintain a file of these measurements, and retain the file for at least two years following the date of such measurements, maintenance reports, and records.

Responses to this information collection are deemed to be mandatory, per section 114(a) of the Clean Air Act. The required information consists of emissions data and other information that have been determined not to be private. However, any information submitted to the Agency for which a claim of confidentiality is made will be safeguarded according to the Agency policies set forth in Title 40, Chapter 1, part 2, Subpart B—Confidentiality of Business Information (see 40 CFR part 2; 41 FR 36902, September 1, 1976; amended by 43 FR 40000, September 8, 1978; 43 FR 42251, September 20, 1978; 44 FR 17674, March 23, 1979).

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB Control Number. The OMB Control Numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR chapter 15, and are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average about 14 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and

maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities:

Owners or operators of coal preparation plants which process more than 200 tons of coal per day.

Estimated Number of Respondents: 616.

Frequency of Response:

Semiannually.

Estimated Total Annual Hour Burden:

17,162 hours.

Estimated Total Capital and Operations & Maintenance (O & M)

Annual Costs: \$21,700 which includes \$0 annualized capital/startup costs and \$21,700 annual O&M costs.

Changes in the Estimates: There is increase of 1,699 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. This increase is due to more accurate accounting of existing sources subject to NSPS Subpart Y and an adjustment in the reporting frequency.

Dated: February 25, 2003

Director, Collection Strategies Division.

Title: NSPS for Industrial-Commercial-Institutional Steam Generating Units (40 CFR part 60, subpart Db), OMB Control Number 2060-0072, EPA ICR Number 1088.10. This is a request to renew an existing approved collection that is scheduled to expire on February 28, 2003. Under the OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB.

Abstract: Owners or operators of steam generating units subject to Subpart Db must make one-time-only notifications of construction/reconstruction, anticipated and actual startup, initial performance test, physical or operational changes, and demonstration of a continuous monitoring system. They must also submit reports on initial performance test results, monitoring results, and excess emissions. Records must be maintained of startups, shutdowns, malfunctions, and periods when the continuous monitoring system is inoperative, and of various fuel combustion and pollutant emission parameters.

The required notifications are used to inform the Agency or delegated authority when a source becomes subject to the standard. Performance test reports are needed as these are the Agency's record of a source's initial capability to comply with the emission standard, and serve as a record of the operating conditions under which compliance was achieved. The monitoring and excess emissions reports are used for problem identification, as a
