

Every 5 years NASS conducts a program review following the completion of the Census of Agriculture. The primary purpose is to ensure that the NASS annual estimating program targets commodities and states most relevant based on the latest available information. The primary source of information for the program review is the Census of Agriculture, since it is the most comprehensive source of data; however we also take into consideration estimates from the current annual estimating program and administrative data. The detailed listing of program changes can be found at the following link: https://www.nass.usda.gov/Surveys/Program_Review/2019/Vegetable-Program.pdf. All questionnaires included in this information collection will be voluntary.
