

Effectiveness against Laboratory-Confirmed Influenza-Associated Hospitalizations, FOA IP15-002, initial review.

In accordance with Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), the Centers for Disease Control and Prevention (CDC) announces the aforementioned meeting:

Time And Date: 10:00 a.m.–4:00 p.m., April 15, 2015 (Closed).

Place: Teleconference.

Status: The meeting will be closed to the public in accordance with provisions set forth in Section 552b(c)(4) and (6), Title 5 U.S.C., and the Determination of the Director, Management Analysis and Services Office, CDC, pursuant to Public Law 92-463.

Matters For Discussion: The meeting will include the initial review, discussion, and evaluation of applications received in response to “Economic Studies of Immunization Policies and Practices”, FOA IP15-001 and “US Platform to Measure Influenza Vaccine Effectiveness against Laboratory-confirmed Influenza-associated Hospitalizations”, FOA IP15-002.

Contact Person For More Information: Gregory Anderson, M.S., M.P.H., Scientific Review Officer, CDC, 1600 Clifton Road NE., Mailstop E60, Atlanta, Georgia 30333, Telephone: (404) 718-8833.

The Director, Management Analysis and Services Office, has been delegated the authority to sign **Federal Register** notices pertaining to announcements of meetings and other committee management activities, for both the Centers for Disease Control and Prevention and the Agency for Toxic Substances and Disease Registry.

Elaine L. Baker,

Director, Management Analysis and Services Office, Centers for Disease Control and Prevention.

[30Day-15-15GD]

Proposed Data Collections Submitted for Public Comment and Recommendations

The Centers for Disease Control and Prevention (CDC) has submitted the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995. The notice for the proposed information collection is published to obtain comments from the public and affected agencies.

Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address any of the following: (a) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) Evaluate the accuracy of the agencies estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (c) Enhance the quality, utility, and clarity of the information to be collected; (d) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses; and (e) Assess information collection costs.

To request additional information on the proposed project or to obtain a copy of the information collection plan and instruments, call (404) 639-7570 or send an email to omb@cdc.gov. Written comments and/or suggestions regarding the items contained in this notice should be directed to the Attention: CDC Desk Officer, Office of Management and Budget, Washington, DC 20503 or by fax to (202) 395-5806. Written comments should be received within 30 days of this notice.

Proposed Project

Emergency Self Escape for Coal Miners—New—National Institute for Occupational Safety and Health (NIOSH), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

The Centers for Disease Control and Prevention's (CDC) mission is to promote health and quality of life by preventing and controlling disease, injury, and disability. The National Institute for Occupational Safety and Health (NIOSH) provides national and world leadership to prevent work-related illness, injury, disability, and death by gathering information, conducting scientific research, and translating knowledge gained into products and services. NIOSH's mission is critical to the health and safety of every American worker. The Office of Mine Safety and Health Research (OMSHR), one of the preeminent mining research laboratories in the world, is focused on occupational health and safety research for mine workers.

Recent research by the National Academy of Sciences (NAS) has called for a detailed, formal task analysis of mine self-escape (National Research Council, 2013). Such an analysis should identify the knowledge, skills, abilities, and other attributes (KSAOs) needed by mine personnel in the event of a mine disaster to successfully complete an emergency self-escape. This analysis will identify gaps between worker demands and capabilities, and propose recommendations to either minimize those gaps or enhance existing systems (e.g., communications, training, technology).

The purpose of the project is to enhance the ability of miners to escape from underground coal mines in the event of a fire, explosion, collapse of the mine structure, or flooding of the area by toxic gas or water. To escape, miners need to perform a set of tasks that apply specific knowledge and skills in moving through the mine, avoiding dangers, and using protective equipment. The project will identify the tasks, knowledge and

skills, procedures, equipment, communications, and physical requirements of self-escape. The results are expected to lead to recommendations for improvements to task requirements and procedures, equipment, training and communication processes.

NIOSH proposes this two-year study to better understand the requirements of emergency self-escape and to answer the following questions:

- What tasks (and critical tasks) do miners perform during self-escape?
- What knowledge beyond that needed to perform normal, routine mining tasks do miners require to facilitate successful self-escape?
- What are the cognitive requirements (such as reasoning, or weighing and deciding among alternatives, recognizing when a course of action is not producing the intended results) beyond that needed to perform normal, routine mining tasks?
- What other cognitive abilities or other cognitive competencies are needed?
- What gaps exist between what miners are required to do for self-escape and their capabilities?
- How can self-escape be improved by redesigning, eliminating, or modifying tasks or training, or by altering or introducing specific technologies/tools?

To answer these questions, we will use a task analysis study design that utilizes a multiple-method approach, to include (a) review of available research, (b) interviews and focus group meetings with participants, and (c) unobtrusive observation (e.g., of drills). During interviews and focus groups, targeted questions are asked to elicit the level and type of desired information. This system of collecting information is "active" in that participants are

presented stimuli (e.g., disaster scenarios, worker roles) and asked directly to provide their perceptions (e.g., of tasks or cognitive requirements needed to accomplish self-escape in that disaster). Observation checklists have been developed to capture relevant information during the unobtrusive naturalistic observations of self-escape drills. These data are then organized, collated, and re-presented to participants for confirmation of accuracy. Recommendations are generated based on study findings, related research and practices, and logical inference.

Participants will be mining personnel drawn from two operating coal mines, one large and one smaller mine, to represent the variety within the industry. The data collection schedule (e.g., timing and duration of interviews and focus groups) will be modified as needed to minimize disruption to mine operations. Up to 30 miner volunteers will participate in the study. Minimal time (<5 minutes each) will be spent in recruitment and obtaining informed consent.

Semi-structured interviews with mine personnel will require 1.5–2 hours of their time depending on the interview. Each of the two focus groups (the Initial Focus Group and the HTA) will require approximately 12 hours of a participant's time total. However, a given focus group will be executed in smaller blocks of time to reduce the burden on participants. Participants in the Initial Focus Group are not required to participate in the HTA Focus Group.

Observation of drills will occur as part of normal mine operations and will not result in any additional burden on the respondents.

The total estimated burden hours are 207.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondent	Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hours)
Underground coal miners	Recruitment Script	30	1	5/60
Underground coal miners	Informed Consent	30	1	5/60
Underground coal miners	Initial Interviews	6	1	1.5
Underground coal miners	CTA Interviews	12	2	2
Underground coal miners	Initial focus group sessions	12	6	1
Underground coal miners	HTA focus group sessions	12	6	1

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

[CFDA Number 93.623]

Announcement of the Award of a Single-Source Grant to Compass Family and Community Services in Youngstown, OH

AGENCY: Family and Youth Services Bureau (FYSB), ACYF, ACF, HHS.

ACTION: Notice of the award of a single-source grant to Compass Family and Community Services in Youngstown, OH.

SUMMARY: The Administration on Children, Youth and Families (ACYF), Family and Youth Services Bureau (FYSB), Division of Adolescent Development and Support (DADS), announces the award of a single-source grant in the amount of \$144,000 to Compass Family and Community Services of Youngstown, OH, under the Basic Center Program.

DATES: Awarded funds will support activities from 04/01/2015 through 03/31/2016.

SUPPLEMENTARY INFORMATION: This single-source award will allow Compass Family and Community Services to operate a short-term emergency shelter for runaway and homeless youth for males and females ages 11 to 18. The program's goals are to alleviate the problems of runaway and homeless youth by reuniting families, whenever possible, or finding alternative living arrangements; strengthening family relationships; building positive relationships with supportive adults; and helping youth decide on constructive courses of action. Compass Family and Community Services is a non-profit organization.

FOR FURTHER INFORMATION CONTACT: Christopher Holloway, Central Office Program Manager, Runaway and Homeless Youth Program, Division of Adolescent Development and Support, Family and Youth Services Bureau, 1250 Maryland Avenue SW., Suite 800, Washington, DC 20024; Telephone: 202-205-9560; Email: Christopher.Holloway@acf.hhs.gov.

Statutory Authority: The Basic Center Program (BCP) grants are authorized by section 311(a)(1) of the Runaway and Homeless Youth Act, 42 U.S.C. 5711(a)(1),

most recently amended by Public Law 110-378 on October 8, 2008.

Mary M. Wayland,

*Senior Grants Policy Specialist, Division of
Grants Policy, Office of Administration.*
