The BLM and FWS will utilize and coordinate the NEPA process to help support compliance with applicable procedural requirements under the ESA (16 U.S.C. 1536). BLM will also use the NEPA process to comply with Section 106 of the NHPA (54 U.S.C. 306108) as provided in 36 CFR 800.2(d)(3), including the public involvement requirements of Section 106. Information about historic and cultural resources within the area potentially affected by the proposed project will assist the BLM in identifying and evaluating impacts to such resources. The BLM will also consult on cultural resources and create a Memorandum of Agreement with consulting parties.

The BLM and FWS will consult with Indian Tribal Nations on a government-to-government basis in accordance with Executive Order 13175, BLM Manual Section 1780, and other Departmental policies. Tribal concerns, including impacts on Indian trust assets and potential impacts to cultural resources, will be given due consideration. Federal, State, and local agencies, along with Indian Tribal Nations and other stakeholders that may be interested in or affected by the proposed action the BLM and the FWS are evaluating, are invited to participate in the scoping process and, if eligible, may request or be requested by the BLM and FWS to participate in the development of the environmental analysis as a cooperating agency.

Abstract: Authorized by the National Park Service Act Organic Act, 54 U.S.C. 100101, we must preserve America's natural wonders unimpaired for future generations, while also making them available for the enjoyment of the visitor. Meeting this mandate requires that we balance preservation with use. Maintaining a good balance requires both information and use. In accordance with regulations at 36 CFR, we issue permits for special park uses. Special park uses cover a wide range of activities including, but not limited to special events, First Amendment activities, grazing and agricultural use, filming, still photography, construction, and vehicle access. Permits are issued for varying durations of time based on the requested use, but generally do not exceed 5 years. A new application must be submitted in order to request the renewal of an existing permit.

The information we collect in the special use applications allows park managers to determine if the requested use is consistent with the laws and NPS regulations referenced above and with the public interest. The park manager must also determine that the requested activity will not cause unacceptable impacts to park resources and values. The information is collected using the following NPS forms:

- 10–930—Application for Special Use Permit
- 10–930c—Application for Special Use Permit—Climbing
- 10–930s—Application for Special Use Permit (short form)
- 10–931—Application for Special Use Permit—Still Photography Permit (short)
- 10–932—Application for Special Use Permit—Still Photography Permit (long)
- 10–933—Application for Special Use Permit—Vehicle/Watercraft Use

With this renewal, we are requesting to introduce two new forms to this collection:

(1) *Form 10–934 Application for Special Use Permit—Demonstrations and Distribution of Materials*. This new form will be used to authorize First Amendment activities in system units.

(2) *Form 10–930q—Special Park Use Application/Permit—Quarry Activities*.

Per 36 CFR 7.42, this new form will be used to authorize quarry activities specific to Pipestone National Monument.

Information collected on the forms is used to evaluate requests for Special Use Permits and facilitate the permitting process. If the requested use is consistent with park regulations, the information collected is used to issue a permit.
