

current mission. The new EHW is needed to maintain operational availability of the TRIDENT Program in the Pacific. The purpose of the proposed action is to meet current and future technical program requirements for the TRIDENT mission.

Alternatives for the proposed action were identified based on capability for meeting TRIDENT Program mission requirements, ability to avoid or minimize environmental impacts, siting requirements including proximity to existing infrastructure, availability of waterfront property, constructability of essential project features, and explosives safety restrictions.

Alternatives currently under consideration include: (1) Deep-Water Trestle EHW; (2) Onshore Trestle EHW; (3) No Action Alternative. For both action alternatives, the EHW would be located in deep water, parallel to and 600 feet from the shore, and placement of structures over the intertidal zone would be minimized. The new EHW would include a covered operations area approximately 600 feet long and 250 feet wide, supplemented by an uncovered wharf extension approximately 700 feet long and 35 feet wide.

The wharf would either be an anchored floating structure or a structure supported by piles. Separate pile-supported entrance and exit trestles, or bridges, would provide a roadway for missile transport vehicles to travel from shore to the EHW and back to shore. For both action alternatives, the entrance trestle would be constructed from the end of the existing EHW access road to connect to the north end of the new EHW. The two action alternatives differ in the location of the exit trestle, which would connect the south end of the new EHW to the existing EHW access road.

Under the Deep-Water Trestle alternative, parallel entry and exit trestles would be constructed to transport ordnance to and from the wharf. The exit trestle would be constructed over deep water to the extent possible, crossing the intertidal zone and returning to land at the existing EHW access road. The Deep-Water Trestle alternative would require approximately 900 feet of additional in-water construction but would avoid construction of a road on the steep embankment adjacent to the proposed EHW site.

For the Onshore Trestle alternative, the exit trestle would be constructed to take the shortest distance to shore from the south end of the new EHW. This alternative would require extension of the exit trestle approximately 1,400 feet

along the edge of the steep embankment on the shore, away from the intertidal zone, to connect to the existing access road.

No decision will be made to implement any alternative until the EIS process is complete, with the release of the Record of Decision. Phased construction of the project would be completed in four years.

The impacts to be evaluated include, but will not be limited to, impacts on fish and marine mammals, essential fish habitat, effects on endangered and threatened species, impacts relating to underwater sound and underwater habitat, impacts to the migratory and transient movement of fish along the shore, impacts on cultural resources, reduction in water quality, impacts on wetlands, terrestrial impacts, effects on Tribal resources, and human health and public safety.

The analysis will include an evaluation of direct, indirect, short term, and long term impacts from the construction and operation of the new EHW and will account for cumulative impacts from other Navy and non-Navy activities in the project area.

The Navy is initiating the scoping process to identify community concerns and local issues to be addressed in the EIS. Federal agencies, State agencies, local agencies, and interested persons are encouraged to provide written comments in addition to, or in lieu of, oral comments at scheduled public scoping meetings.

Written comments must be postmarked by midnight July 17, 2009 and should be submitted to: Mr. Patrick Grzelak, Public Affairs Officer, Department of the Navy, Strategic Systems Programs, 2521 South Clark Street, Suite 1000, Arlington, VA 22202-3930, telephone: 703-601-9008, e-mail: nbkehweis@ssp.navy.mil.

Dated: May 11, 2009.

T.M. Cruz,

Lieutenant Commander, Alternate Federal Register Liaison Officer.

BILLING CODE 3810-FF-P

DEPARTMENT OF DEFENSE

Department of the Air Force

[Docket ID: USAF-2009-0031]

Privacy Act of 1974; System of Records

AGENCY: Department of the Air Force, DoD.

ACTION: Notice to delete a system of records.

SUMMARY: The Department of Air Force is deleting a system of records notice from its inventory of record systems subject to the Privacy Act of 1974 (5 U.S.C. 552a), as amended.

DATES: The proposed action will be effective on June 15, 2009 unless comments are received that would result in a contrary determination.

ADDRESSES: Send comments to the Air Force Privacy Act Officer, Office of Warfighting Integration and Chief Information Officer, SAF/XCISI, 1800 Air Force Pentagon, Suite 220, Washington, DC 20330-1800.

FOR FURTHER INFORMATION CONTACT: Mr. Ben Swilley, 703-696-6172.

SUPPLEMENTARY INFORMATION: The Department of the Air Force system of records notices subject to the Privacy Act of 1974, (5 U.S.C. 552a), as amended, have been published in the **Federal Register** and are available from the address above.

The Department of the Air Force proposes to delete a system of records notice from its inventory of record systems subject to the Privacy Act of 1974 (5 U.S.C. 552a), as amended. The proposed deletion is not within the purview of subsection (r) of the Privacy Act of 1974, (5 U.S.C. 552a), as amended, which requires the submission of a new or altered system report.

Dated: May 12, 2009.

Morgan E. Frazier,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

F036 AETC T

DELETION:

SYSTEM NAME:

Flying Training Records—Nonstudent (June 11, 1997, 62 FR 31793).

REASON:

The records contained in this system of records are no longer required. Accordingly, this Privacy Act System of Records Notice will be deleted from the Air Force's inventory.
