

It is further ordered that, consistent with 10 CFR 2.1315(b), license amendments that make changes, as indicated in Enclosure 2 to the cover letter forwarding this Order, to conform the licenses to reflect the subject transfer of operating authority is approved. The amendments shall be issued and made effective at the time the proposed transfer is completed.

This Order is effective upon issuance.

For further details with respect to this action, see the initial application dated November 24, 1999, and supplement dated January 31, 2000, and the safety evaluation dated May 15, 2000, which are available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, and accessible electronically through the ADAMS Public Electronic Reading Room link at the NRC Web site (<http://www.nrc.gov>).

BILLING CODE 7510-01-M

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-305; License No. DPR-43]

Wisconsin Public Service Corporation, Wisconsin Power and Light Company, and Madison Gas and Electric Company; (Kewaunee Nuclear Power Plant, Unit No. 1); Order Approving Transfer of Operating Authority and Conforming Amendment

I.

Wisconsin Public Service Corporation (WPSC), Wisconsin Power and Light Company (WP&L), and Madison Gas and Electric Company (MGE) (the licensees), are the holders of Facility Operating License No. DPR-43, which authorizes operation of Kewaunee Nuclear Power Plant, Unit No. 1 (Kewaunee or the facility). The facility is located at the licensees' site in Kewaunee County, Wisconsin. The license authorizes the licensees to possess, use, and operate Kewaunee.

II.

By application dated November 24, 1999, as supplemented December 7, 1999, and February 8, 2000, the Commission was informed that WPSC, on behalf of itself and WP&L and MGE, entered into operating service agreements with Nuclear Management

Company, LLC (NMC). The initial application and the supplements are hereinafter referred to as "the application" unless otherwise indicated. Under the proposed transaction, NMC will be designated as the exclusive licensee authorized to use and operate Kewaunee in accordance with the terms and conditions of the license. The transaction involves no change in plant ownership. WPSC requested approval of the proposed transfer of operating authority under the Kewaunee facility operating license to NMC. The application also requested a conforming amendment to reflect the transfer. The proposed amendment would add NMC to the license as the licensee authorized to use and operate Kewaunee, and make changes to the license to reflect that the current licensees no longer have operating authority.

According to the application for approval filed by WPSC, NMC would become the licensee authorized to use and operate Kewaunee following approval of the proposed license transfer. NMC will assume exclusive responsibility for the operation and maintenance of Kewaunee. Ownership of Kewaunee will not be affected by the proposed transfer of operating authority. WPSC, WP&L, and MGE will retain their current ownership interest. NMC will not own any portion of Kewaunee. Likewise, the licensees' entitlement to capacity and energy from Kewaunee will not be affected by the transfer of operating authority. No physical changes to the Kewaunee facility were proposed in the application.

Approval of the transfer of operating authority under the facility operating license and conforming license amendment was requested by WPSC pursuant to 10 CFR 50.80 and 50.90. Notice of the application for approval and an opportunity for a hearing was published in the **Federal Register** on February 4, 2000 (65 FR 5706). No hearing requests or written comments were received.

Pursuant to 10 CFR 50.80, no license, or any right thereunder, shall be transferred, directly or indirectly, through transfer of control of the license, unless the Commission shall give its consent in writing. Upon review of the information in the application by WPSC, and other information before the Commission, and relying upon the representations and agreements contained in the application, the NRC staff has determined that NMC is qualified to hold the operating authority under the license and that the transfer of the operating authority under the license to NMC is otherwise consistent with applicable provisions of law,

regulations, and orders issued by the Commission, subject to the conditions set forth below. The NRC staff has further found that the application for the proposed license amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended, and the Commission's rules and regulations set forth in 10 CFR Chapter 1; the facility will operate in conformity with the application, the provisions of the Act and the rules and regulations of the Commission; there is reasonable assurance that the activities authorized by the proposed license amendment can be conducted without endangering the health and safety of the public and that such activities will be conducted in compliance with the Commission's regulations; the issuance of the proposed license amendment will not be inimical to the common defense and security or the health and safety of the public; and the issuance of the proposed amendment will be in accordance with 10 CFR Part 51 of the Commission's regulations and all applicable requirements have been satisfied. The foregoing findings are supported by a Safety Evaluation dated May 15, 2000.

III.

Accordingly, pursuant to Sections 161b, 161i, and 184 of the Atomic Energy Act of 1954, as amended, 42 U.S.C. 2201(b), 2201(i), and 2234, and 10 CFR 50.80, *It is hereby ordered* that the transfer of operating authority under the license as described herein to NMC is approved, subject to the following conditions:

(1) After receipt of all required regulatory approvals of the transfer of operating authority to NMC, WPSC and NMC shall inform the Director of the Office of Nuclear Reactor Regulation in writing of such receipt within 5 business days and of the date of the closing of the transfer no later than 7 business days before the date of closing. If the transfer is not completed by April 1, 2001, this Order shall become null and void, provided, however, upon written application and for good cause shown, such date may in writing be extended.

(2) NMC shall, prior to completion of the transfer of operating authority of Kewaunee, provide the Director of the Office of Nuclear Reactor Regulation satisfactory documentary evidence that NMC has obtained the appropriate amount of insurance required of licensees under 10 CFR Part 140 of the Commission's regulations.

It is further ordered that consistent with 10 CFR 2.1315(b), a license amendment that makes changes, as

indicated in Enclosure 2 to the cover letter forwarding this Order, to conform the license to reflect the subject transfer of operating authority is approved. The amendment shall be issued and made effective at the time the proposed transfer is completed.

This Order is effective upon issuance.

For further details with respect to this action, see the initial application dated November 24, 1999, and supplements dated December 7, 1999, and February 8, 2000, and the safety evaluation dated May 15, 2000, which are available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, and accessible electronically through the ADAMS Public Electronic Reading Room link at the NRC Web site (<http://www.nrc.gov>).

NUCLEAR REGULATORY COMMISSION

Regulatory Guide; Issuance, Availability

The Nuclear Regulatory Commission has issued a revision to a guide in its Regulatory Guide Series. This series has been developed to describe and make available to the public such information as methods acceptable to the NRC staff for implementing specific parts of the Commission's regulations, techniques used by the staff in evaluating specific problems or postulated accidents, and data needed by the staff in its review of applications for permits and licenses.

Revision 3 of Regulatory Guide 1.8, "Qualification and Training of Personnel for Nuclear Power Plants," provides current guidance on qualifications and training for nuclear power plant personnel that is acceptable to the NRC staff. This regulatory guide endorses ANSI/ANS-3.1-1993, "Selection, Qualification, and Training of Personnel for Nuclear Power Plants," with certain clarifications, additions, and exceptions.

Comments and suggestions in connection with items for inclusion in guides currently being developed or improvements in all published guides are encouraged at any time. Written comments may be submitted to the Rules and Directives Branch, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555.

Recently published regulatory guides are available on the NRC's web site at <WWW.NRC.GOV> in the Reference Library under Regulatory Guides. Regulatory guides are also available for inspection at the Commission's Public Document Room, 2120 L Street NW., Washington, DC.
