

The Exchange believes that the proposed change to the QMM Program in NASDAQ Rule 7014(e)(1) of only having Tape A and Tape B securities be eligible to receive the additional QMM rebate of \$0.0002 per share executed with respect to orders that are executed at a price of \$1 or more and that meet the Additional QMM Rebate Criteria, is reasonable because the Exchange believes that firms no longer need the additional incentive to quote at the NBBO in Nasdaq-listed securities ("Tape C"). The Exchange also believes this change is consistent with a fair allocation of a reasonable fee and not unfairly discriminatory because the additional rebate only applying to Tape A and Tape B securities will apply uniformly to all QMM members.

The Exchange also believes that the proposed change to the QMM Program in NASDAQ Rule 7014(e)(2) of only having Tape A and Tape B securities receive the additional QMM credit of \$0.0001 per share executed with respect to all other displayed orders (other than Designated Retail Orders, as defined in Rule 7018) in securities priced at \$1 or more per share that provide liquidity and that are entered through a QMM MPID is reasonable because the Exchange believes that firms no longer need the additional incentive to quote in Tape C.

The Exchange also believes that this change is consistent with a fair allocation of a reasonable fee and not unfairly discriminatory because the additional QMM credit only applying to Tape A and Tape B securities will apply uniformly to all QMM members.

B. Self-Regulatory Organization's Statement on Burden on Competition

NASDAQ does not believe that the proposed rule changes will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act, as amended.⁶ NASDAQ notes that it operates in a highly competitive market in which market participants can readily favor competing venues if they deem fee levels at a particular venue to be excessive, or rebate opportunities available at other venues to be more favorable. In such an environment, NASDAQ must continually adjust its fees to remain competitive with other exchanges and with alternative trading systems that have been exempted from compliance with the statutory standards applicable to exchanges. Because competitors are free to modify their own fees in response, and because market

participants may readily adjust their order routing practices,

NASDAQ believes that the degree to which fee changes in this market may impose any burden on competition is extremely limited or even non-existent. In this instance, the changes to credits for the ISP and QMM programs do not impose a burden on competition because these NASDAQ incentive programs remain in place, still offer economically advantageous credits, and are reflective of the need for exchanges to offer and to let the financial incentives to attract order flow evolve. While the Exchange does not believe that the proposed changes will result in any burden on competition, if the changes proposed herein are unattractive to market participants it is likely that NASDAQ will lose market share as a result.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others
