

downward trend in ozone. There are no areas in the West where ozone is predicted to be higher in 2012 (without CAIR) compared to 2005. On these bases it is plausible to conclude that it is highly unlikely, but not impossible, for these monitors to be at risk for maintenance of the 1997 8-hour ozone NAAQS.

In conclusion, the variety of data and the weight of evidence analysis presented in this section support the position of the Colorado Interstate Transport SIP (adopted into the State SIP on December 30, 2008 and submitted to EPA June 18, 2009) that emissions from Colorado do not interfere with maintenance of the 1997 8-hour ozone NAAQS by any other state, consistent with the requirements of element (2) of CAA section 110(a)(2)(D)(i).

VI. Proposed Action

EPA is proposing partial approval of the Colorado SIP to meet the requirements of Section 110(a)(2)(D)(i)(I) regarding the 1997 8-hour ozone standard. Specifically, in this action EPA is proposing to approve only the language and demonstration that address the requirements of element (2): Prohibition of interference with maintenance of the 1997 8-hour ozone NAAQS by any other state. EPA approved in a June 3, 2010 final action the language and demonstration addressing element (1): Prohibition of significant contribution to nonattainment of the 1997 8-hour ozone NAAQS in any other state.

VII. Statutory and Executive Order Review

Under the Clean Air Act, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA's role is to approve state choices, provided that they meet the criteria of the Clean Air Act. Accordingly, this action merely approves state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

- Is not a "significant regulatory action" subject to review by the Office of Management and Budget under Executive Order 12866 (58 FR 51735, October 4, 1993);
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);

- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);

- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104-4);

- Does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);

- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);

- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);

- Is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the Clean Air Act; and

- Does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, this rule does not have tribal implications as specified by Executive Order 13175 (65 FR 67249, November 9, 2000), because the SIP is not approved to apply in Indian country located in the state, and EPA notes that it will not impose substantial direct costs on tribal governments or preempt tribal law.

Approval and Promulgation of Implementation Plans; Extension of Attainment Date for the Atlanta, GA 1997 8-Hour Ozone Moderate Nonattainment Area

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The State of Georgia, through the Georgia Department of Natural Resources (GA DNR), submitted a letter on June 9, 2010, with a request for EPA to grant a one-year extension of the attainment date for the 1997 8-hour

ozone national ambient air quality standards (NAAQS) for the Atlanta, Georgia Area (hereafter referred to as the "Atlanta Area"). As a result, EPA is proposing to approve a one-year extension of the 1997 8-hour ozone moderate attainment date for the Atlanta Area. Specifically, EPA is proposing to extend the Atlanta Area's attainment date from June 15, 2010, to June 15, 2011.
