II. Background

A. What Action is the Agency Taking?

This notice constitutes and announces the availability of the TRED for pronamide. This decision has been developed as part of the public participation process that EPA and the U.S. Department of Agriculture (USDA) are using to involve the public in the reassessment of pesticide tolerances under FFDCA. EPA must review tolerances and tolerance exemptions that were in effect when FQPA was enacted in August 1996, to ensure that these existing pesticide residue limits for food and feed commodities meet the safety standard of the new law.

FFDCA requires EPA to review all the tolerances for registered chemicals in effect on or before the date of the enactment. In reviewing these tolerances, the Agency must consider, among other things, aggregate risks from non-occupational sources of pesticide exposure, whether there is increased susceptibility to infants and children, and the cumulative effects of pesticides with a common mechanism of toxicity. The tolerances are considered reassessed once the safety finding has been made or a revocation occurs. A reregistration eligibility decision (RED) was completed for pronamide in April 1994, prior to FQPA enactment, and therefore needed an updated assessment to consider the provisions of the Act.

FFDCA requires that the Agency, when considering whether to establish, modify, or revoke a tolerance, consider "available information" concerning the cumulative effects of a particular pesticide's residue and "other substances that have a common mechanism of toxicity."

As indicated above, the Agency will also evaluate the cumulative risk, if necessary, posed by the entire group of chemicals with which a common mechanism of toxicity is shared, and issue a final tolerance reassessment decision once the cumulative

assessment for that group is completed. At this time, pronamide has not been identified as sharing a common method of toxicity and is not scheduled for a cumulative risk assessment.

All registrants of pesticide products containing one or more of the active ingredients listed in this document are being sent the TRED, and must respond to labeling requirements within 8 months of receipt. Furthermore, the Agency requests a response to all generic confirmatory data from technical registrants within 90 days of receipt.

The reregistration program is being conducted under congressionally-mandated time frames, and EPA recognizes both the need to make timely reregistration decisions and to involve the public. Therefore, EPA is issuing this TRED as a final document with a 30-day comment period. All comments will be carefully considered by the Agency. If any comment significantly affects the TRED, EPA will amend the TRED by publishing the amendment in the **Federal Register**.

B. What is the Agency's Authority for Taking this Action?

The legal authority for these TREDs falls under FIFRA, as amended in 1988 and 1996. Section 4(g)(2)(A) of FIFRA directs that, after submission of all data concerning a pesticide active ingredient, "the Administrator shall determine whether pesticides containing such active ingredients are eligible for reregistration," and either reregistering products or taking "other appropriate regulatory action."
