

Recordkeeping: Staff estimates that all 58 manufacturers will require 30 minutes to comply with the Rule's recordkeeping requirements for a total of 29 hours.

Producing labels: Staff estimates 2.5 hours as the average time required of manufacturers to produce labels for each of the five new AFV models introduced among them each year for a total of 12.5 hours.

Posting labels: Staff estimates 2 minutes as the average time to comply with the posting requirements for each of the approximately 30,000 new AFVs manufactured each year for a total of 1,000 hours.

Sub-total: Approximately 1,041 hours (29 + 12.5 + 1,000).

Thus, total burden for these industries combined is approximately 2,100 hours (1,050 + 1,041).

Estimated labor costs: \$47,000, rounded.

Labor costs are derived by applying appropriate hourly cost figures to the burden hours described above. According to Bureau of Labor Statistics staff, the average compensation for producers and distributors in the fuel industry is \$18.98 per hour and \$8.56 per hour for service station employees; the average compensation for workers in the vehicle industry is \$27.80 per hour.

Non-liquid alternative fuels:

Certification and labeling: Generally, all of the estimated hours except for recordkeeping will be performed by procedures and distributors of fuels. Thus, the associated labor costs would be \$16,512.60 (870 hours × \$18.98).

Recordkeeping: Only 1/6 of the total 180 hours will be performed by the producers and distributors of fuels; the other 5/6 is attributable to service station employees (1/6 = 30 hours × \$18.98 = \$569.40 + (5/6 = 150 hours × \$8.56 = \$1,284.00) = \$1,853.40, for an estimated labor cost to the entire industry of \$18,366.00.

AFV manufacturers:

The maximum labor cost to the entire industry is approximately \$28,939.80 per year for recordkeeping and producing and posting labels (1,041 total hours × \$27.80/hour).

Thus, estimated total labor cost for both industries for all paperwork requirements is \$47,000 (\$18,366.00 + \$28,939.80) per year, rounded to the nearest thousand.

Estimated annual non-labor cost burden: \$12,000, rounded.

Non-liquid alternative fuels:

Staff believes that there are no current start-up costs associated with the Rule, inasmuch as the Rule has been effective since 1995. Industry members, therefore, have in place the capital

equipment and means necessary, especially to determine automotive fuel ratings and comply with the Rule. Industry members, however, incur the cost of procuring fuel dispenser and AFV labels to comply with the Rule. The estimated annual fuel labeling cost, based on estimates of 500 fuel dispensers (assumptions: an estimated 20% of 1,250 total retailers need to replace labels in any given year given an approximate five-year life of labels—i.e., 250 retailers—multiplied by an average of two dispensers per retailer) at thirty-eight cents for each label (per industry sources), is \$190.00.

AFV manufacturers:

Here, too, staff believes that there are no current start-up costs associated with the Rule, for the same reasons as stated immediately above regarding the non-liquid alternative fuel industry. However, based on the labeling of an estimated 30,000 new and used AFVs each year at thirty-eight cents for each label (per industry sources), the annual AFV labeling cost is estimated to be \$11,400.

Thus, estimated total annual non-labor cost burden associated with the Rule is \$12,000 (\$190.00 + \$11,400.00), rounded to the nearest thousand.
