

working over a period of 12 months, alternating between Learning Sessions in which teams come together to learn about the chosen topic and to plan changes, and Action Periods in which the teams return to their respective organizations and test those changes in their clinic settings. The domains for the proposed CoPs are trauma informed care, pre-conception counseling, and youth transitioning into adult HIV care services.

Need and Proposed Use of the Information: Process and outcome evaluations are a critical part of ensuring that CoP initiatives were implemented as planned and met their intended outcome. Evaluation of technical assistance (TA) depends on establishing clear goals and plans from the beginning of the process. This includes specifying the intended impact of the TA with concrete, measurable objectives. To judge performance against goals, HRSA will administer TA evaluation surveys following TA and

training, webinars, teleconferences, and meetings. Findings will drive quality improvement activities and reports.

The evaluation plan focuses on process and impact evaluation of all CoP Teams (Pre-Conception Counseling and Sexual Health, Trauma-Informed Care, and Transitioning Adolescents to Adult Care) over the duration of the 4-year period of performance. The evaluation plan components will be operationalized to include TA satisfaction measures (reaction), change in knowledge after the TA (learning), and change in behavior or practice after the introduction of evidence-based interventions (behavior). More specifically, the evaluation plan includes (1) post TA satisfaction measures, (2) pre-post measures of CoP staff knowledge about effective practices, (3) retrospective measures to gather measures of CoP staff knowledge for the first community of practice only, and (4) measures of TA usefulness and impact on CoP performance.

Likely Respondents: Up to 90 RWHAP Part D Women, Infant, Children, Youth recipients will participate in the CoPs. Each recipient may have up to six staff members who may complete the survey.

Burden Statement: Burden in this context means the time expended by persons to generate, maintain, retain, disclose, or provide the information requested. This includes the time needed to review instructions; to develop, acquire, install, and utilize technology and systems for the purpose of collecting, validating and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information; to search data sources; to complete and review the collection of information; and to transmit or otherwise disclose the information. The total annual burden hours estimated for this ICR are summarized in the table below.

TOTAL ESTIMATED ANNUALIZED BURDEN HOURS

Form name	Number of respondents	Number of responses per respondent	Total responses	Average burden per response (in hours)	Total burden hours
Pre-conception Counseling Community of Practice Retrospective Pre-test-Post Assessment	90	1	90	.4733	42.6
Community of Practice Pre-Assessment	180	1	180	.2900	52.2
Community of Practice Post-Assessment	180	1	180	.3767	67.8
Community of Practice Session Assessment	270	6	1,620	.0767	124.3
Targeted and Intensive TA Assessment	120	1	120	.0833	10.0
Foundational TA Assessment	150	1	150	.0616	9.2
	990	2,340	306.1

HRSA specifically requests comments on (1) the necessity and utility of the proposed information collection for the proper performance of the agency's functions, (2) the accuracy of the estimated burden, (3) ways to enhance the quality, utility, and clarity of the information to be collected, and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.
