

The human remains and associated funerary objects were excavated from Nunavak, near north Nunavak Lagoon (Nunavak Bay) between June 4 and August 29, 1929, by Alfred Henry Hopson, a longtime resident of Barrow, as part of a Penn Museum Expedition. They were accessioned in the same year (PM Accession 29–80). The collection dates to the Birnirk Period (ca. 650–1300 CE).

There is no known presence of any potentially hazardous substances.

Diablo Canyon is located in Avila Beach, California, approximately 12 miles west-southwest of San Luis Obispo, California. Possible alternatives to the proposed action of license renewal for Diablo Canyon were evaluated and included the no-action alternative and replacement power alternatives.

DATES: NUREG–1437, Supplement 62 is available as of June 20, 2025.

SUPPLEMENTARY INFORMATION:**I. Background**

In accordance with section 51.118 of title 10 of the *Code of Federal Regulations*, “Final environmental impact statement—notice of availability,” the NRC is making available to the public NUREG–1437, Supplement 62. A Notice of Availability of the draft of NUREG–1437, Supplement 62 was published in the **Federal Register** on November 1, 2024 (89 FR 87433). The U.S. Environmental Protection Agency issued its Notice of Availability on November 1, 2024 (89 FR 87366). The public comment period on the draft of NUREG–1437, Supplement 62 ended on December 16, 2024, and the comments received are addressed in NUREG–1437, Supplement 62.

II. Discussion

The draft of NUREG–1437, Supplement 62 was issued for public comment on November 1, 2024. NUREG–1437, Supplement 62 addresses the comments received. As discussed in Chapter 4 of NUREG–1437, Supplement 62, the NRC staff has determined that the adverse environmental impacts of license renewal for Diablo Canyon (*i.e.*, the continued operation of Diablo Canyon for a period of 20 years beyond the expiration dates of the current operating licenses) are not so great that preserving the option of license renewal for energy-planning decision-makers would be unreasonable. This recommendation is based on: (1) information in the environmental report, as supplemented, and other documents submitted by Pacific Gas and Electric Company; (2) consultation with Federal, State, Tribal, and local governmental agencies; (3) the NRC staff's independent environmental review; and (4) the NRC staff's consideration of public comments received during the scoping process and on the draft of NUREG–1437, Supplement 62.

Dated: June 24, 2025.

For the Nuclear Regulatory Commission.

Kimyata Morgan-Butler,

*Acting Deputy Director, Division of
Rulemaking, Environmental, and Financial
Support, Office of Nuclear Material Safety and
Safeguards.*
