

guidance does not change transportation conformity rule requirements for hot-spot analyses, such as what types of projects are subject to hot-spot analyses. EPA notes that the guidance, once finalized, would help implement existing requirements in the CAA and conformity rule and is not a regulation.

IV. Request for Comments

EPA is seeking comment on all aspects of the draft PM hot-spot modeling guidance. In particular, EPA is seeking comments on the following:

(1) Does the draft guidance provide sufficient information on how to configure and run MOVES2010 and EMFAC2007 at the project level?

(2) Do the air quality modeling sections of the draft guidance and references to other existing documents provide sufficient detail for air quality modelers to conduct PM hot-spot analyses using AERMOD or CAL3QHC?

(3) Is there sufficient information in the draft guidance to calculate design values and determine appropriate receptors? If not, what additional information is necessary?

(4) Are there issues that the draft guidance does not address that should be addressed in the final guidance or in other EPA efforts?

(5) What types of outreach, training, and other technical assistance would be helpful in implementing the final guidance?

EPA encourages those submitting comments to provide specific details and/or examples wherever possible.

Dated: May 17, 2010.

Margo Tsirigotis Oge,
Director, Office of Transportation and Air Quality.
