The Proposed Action will not significantly affect the quality of the human environment or otherwise include any condition requiring consultation pursuant to Section 102(2)(C) of NEPA, and that an Environmental Impact Statement (EIS) is therefore not necessary. The FONSI/ROD documents the FAA's decision to implement the Proposed Action alternative as detailed in and supported by the Final EA. The proposed instrument approach procedure will enhance public aviation safety by providing pilots with lateral and vertical electronic guidance to ensure a stabilized approach to landing, particularly during marginal and poor weather conditions. The proposed instrument approach procedure will also reduce delays at the Airport by reducing the number of flights that must be canceled during times of poor weather, resulting in an increase in efficiency at the airport as well as the National Airspace System (NAS) as a whole.

Background: The California High-Speed Rail Authority (CHSRA) is advancing the environmental review of the San Francisco to San Jose Section (Project) of the California HSR System pursuant to 23 U.S.C. 327, under which it has assumed FRA's environmental review responsibilities. However, under Section 327, FRA remains responsible for making General Conformity Determinations under the Clean Air Act. This draft General Conformity Determination documents FRA's evaluation of the Project, consistent with the relevant sections of the Clean Air Act and its implementing regulations.

FRA conducted the analysis of the Project's potential emissions consistent with all regulatory criteria and procedures and following CHSRA's coordination with the U.S. Environmental Protection Agency, Bay Area Air Quality Management District (BAAQMD), and the California Air Resources Board. Coordination among these entities supports a finding that Project-generated emissions will either be offset for its construction phase or will be less than zero for its operational phase, and that the Project's emissions can be accommodated in the Statewide Implementation Plan (SIP) for the San Francisco Bay Area Air Basin (SFBAAB). FRA concludes that the Project, as designed, conforms to the approved SIP, based on a commitment from the CHSRA that construction-phase NO_x emissions will be offset consistent with the applicable federal regulations in the SFBAAB.

Next Steps

The draft General Conformity Determination for the Project is being issued for public review and comment for 30 days at Docket No. FRA-2022-0026. Comments related to Docket No. FRA-2022-0026 may be submitted by going to <https://www.regulations.gov> and following the online instructions for submitting comments. Although CHSRA is assisting FRA by disseminating notice of the availability of the draft General Conformity Determination through its

usual outreach methods, CHSRA is not accepting comments on behalf of FRA. FRA cannot ensure consideration of any comment that is not submitted via <https://www.regulations.gov>. FRA will consider all relevant comments it receives before issuing a Final General Conformity Determination.
