

Child Welfare System (QIC–ChildRep) under a cooperative agreement. The purpose of the QIC–ChildRep is to improve the quality of legal representation for children and youth in child welfare cases so that States and Tribes achieve the best safety, permanency, and well-being outcomes for children and youth. This systems improvement model funds three research and demonstration sites, each involving a rigorous evaluation. Given the complexity of the models being implemented, considerable training, technical assistance, monitoring and support are necessary for each site to design and implement evaluation plans. Supplemental funds will allow for an increased level of effort in conducting evaluations to meet the requirements of the cooperative agreement. Additional training, technical assistance, and support to each research and demonstration site, coupled with more intensive monitoring of site specific evaluation efforts, will enhance the depth and rigor of all evaluation results.
