III. Provisions for Disposition of Existing Stocks

Existing stocks are those stocks of registered pesticide products that are currently in the United States and that were packaged, labeled, and released for shipment prior to the effective date of the action. If the requests for voluntary cancellation and/or amendments to terminate uses are granted, the Agency intends to publish the cancellation order in the **Federal Register**.

In any order issued in response to these requests, EPA anticipates including the following provisions for the treatment of any existing stocks of the products listed in Unit II.

For voluntary product cancellations listed in Table 1 of Unit II., registrants will be permitted to sell and distribute existing stocks of voluntarily canceled products for 1 year after the effective date of the cancellation, which will be the date of publication of the cancellation order in the **Federal Register**. Thereafter, registrants will be prohibited from selling or distributing the products identified in Table 1 of Unit II., except for export consistent with FIFRA section 17 (7 U.S.C. 136o) or for proper disposal.

For those products identified in Table 1A of Unit II., the registrant has requested 18-months after the date of publication of the cancellation order in the **Federal Register** to sell existing stocks. Thereafter, the registrant will be prohibited from selling or distributing the products identified in Table 1A of Unit II., except for export consistent with FIFRA section 17 (7 U.S.C. 136o) or for proper disposal.

Once EPA has approved labels for the products listed in Table 2 of Unit II., (amended to reflect the requested amendments to terminate uses), registrants will be permitted to sell or distribute products under the previously approved labeling for a period of 18 months after the date of publication of the cancellation order in the **Federal Register**, unless other restrictions have been imposed. Thereafter, registrants will be prohibited from selling or distributing the products whose labels include the terminated uses identified

in Table 2 of Unit II., except for export consistent with FIFRA section 17 (7 U.S.C. 136o) or for proper disposal.

Persons other than the registrant will generally be allowed to sell, distribute, or use existing stocks of canceled products and/or products whose labels include the terminated uses until supplies are exhausted, provided that such sale, distribution, or use is consistent with the terms of the previously approved labeling on, or that accompanied, the canceled products and/or terminated uses.

On August 29, 2024, the Commission released a Report and Order, WT Docket No. 22–323, *Spectrum Rules and Policies for the Operation of Unmanned Aircraft Systems*, FCC 24–91 (90 FR 1380, January 8, 2025). Among the adopted rules intended to enable uncrewed aircraft systems (UAS)

operators to access dedicated, reliable spectrum in the 5030–5091 MHz band to support safety-of-flight, control-related communications, while also allowing flexibility for the industry to further develop, the Commission added new rules in 47 CFR part 88 and revised Form 731, the Application for Equipment Authority. These new rules provide a critical first step to promote access by UAS operators to dedicated spectrum, while also allowing a consensus to emerge on key issues for this industry.

These new rules resulting in revisions to the information collection are as follows:

§ 88.111 Certification Required

Each transmitter utilized for operation under this part and each transmitter marketed as set forth in § 2.803 of this chapter must be certified by the Commission for use in part 88 services following the procedures set forth in part 2, subpart J of this chapter.

§ 88.113 Authorization of Equipment

An applicant for certification of equipment intended for transmission in the 5030–5091 MHz band must notify the FAA of the filing of a certification application. The letter of notification must be mailed to: Federal Aviation Administration (FAA), Spectrum Engineering Service Group, AJW–1900, 800 Independence Ave. SW, Washington, DC 20591 prior to the filing of the application with the Commission.

(a) The notification letter must describe the equipment, and give the manufacturer's identification, antenna characteristics, rated output power, emission type and characteristics, the frequency or frequencies of operation, and essential receiver characteristics if protection is required.

(b) The certification application must include a copy of the notification letter to the FAA. The Commission will not act until it receives the FAA's determination regarding whether it objects to the application for equipment authorization. The FAA should mail its determination to: Office of Engineering and Technology Laboratory Division, Equipment Authorization and Compliance Branch, 7435 Oakland Mills Rd., Columbia, MD 21046. The Commission will consider the FAA determination before taking final action on the application.

§ 88.115 RF Safety

Licensees and manufacturers are subject to the radio frequency radiation exposure requirements specified in §§ 1.1307(b), 1.1310, 2.1091, and 2.1093 of this chapter, as appropriate.

Applications for equipment authorization of mobile or portable devices operating under this section must contain a statement confirming compliance with these requirements for both fundamental emissions and unwanted emissions and technical information showing the basis for this statement must be submitted to the Commission upon request.

Federal Communications Commission.
