

Processing Center and the designated state recipient in the same manner that the Form R is submitted. The Form A Certification Statement provides a signed statement that the sum of the amount of the listed toxic chemical or chemicals in releases or wastes did not exceed the appropriate PBT or Non-PBT release and waste thresholds for the reporting year, and that the chemical(s) was manufactured, processed, or otherwise-used in an amount not exceeding 1,000,000 pounds during this reporting year. A single Form A Certification Statement may contain as many listed toxic chemicals as meet the conditions of the alternate threshold.

Estimated Number of Responses:

10,235.

Estimated Number of Respondents:

10,235.

Frequency of Response: Once per year.

Estimated Total Annual Hour Burden:

515,901.

Estimated Total Annual Cost:

\$26,007,920 includes \$0 annualized capital or O&M costs.

Changes in the Estimates: In this ICR Renewal, the effect of the TRI final rule expanding the eligibility criteria for Form A is expected to reduce the overall burden for TRI reporting overall due to increased Form A eligibility (i.e., number of Form Rs decreased and number of Form As increased, yielding a net burden decrease) with total respondent burden of Form A reporting projected at 515,284 hours. The TRI Program is proposing to add certain data elements to both reporting forms, but the addition of these data elements is estimated to be relatively small, increasing the total reporting burden for Form A reporting to 515,901 hours.

Proposed Changes from the Last Approval: EPA proposes to make the following changes to the TRI Form A Certification Statement:

(1) *Enhance Public Contact information (applies to Form R and A.)* EPA proposes to add a "Public Contact" field to the Form A Certification Statement so that a facility can provide the name of a person who can respond to questions from the public about the facility's Form A. This field would include the name, telephone number, and e-mail address for the public contact to make it easy to contact the individual identified. To date, some public contact information has been collected on Form R, but not on Form A.

(2) *Add boxes for entering revision codes (applies to Form R and Form A.)* The TRI Program currently receives

many form revisions each year, but does not currently collect information on the reasons for the revisions. The new revision codes will allow both the public and the TRI Program staff to better understand why a facility resubmitted a form. In addition, by analyzing the reasons for revisions, the TRI Program may be better able to address recurring reporting issues or problems that facilities may be facing, ultimately reducing errors and saving time for both the Agency and the reporting facilities. Therefore, facilities will now report up to two codes (listed and defined in the RFIs) indicating the main reason(s) that a form is being revised.

(3) *Provide a field for withdrawing a form; and add boxes for entering withdrawal codes (applies to Form R and Form A.)* Currently, a facility that wishes to withdraw a previously submitted form must submit its request, including the rationale, as a hard copy memorandum to the TRI Data Processing Center. Adding a "Withdrawal" field and associated code boxes for reasons for withdrawal to Form A will (1) streamline the withdrawal process for facilities, (2) make it easier for EPA to automate the withdrawal process, and (3) improve the Agency's ability to analyze the reasons for withdrawals.

Notes:

1. EPA also proposed other changes (72 FR 37762; July 11, 2007) but has since concluded those changes are not necessary.

2. Baseline adjustments were made to "Number of Responses," "Number of Respondents" and "Burden Hours" to reflect the most recent conditions of RY2005. In the last ICR, RY2002 was the base year; in the last OMB Action, RY2004 was the base year. Over this period of time, the total number of Form A submissions declined.

3. An additional change was made to the Form A "Number of Responses" and "Number of Respondents" to adjust for previously overstated counts.
