The Administrator responded to the CASAC's letter on the External Review Draft of the Ozone ISA on April 1, 2020, and the letter is available at: [https://yosemite.epa.gov/sab/sabproduct.nsf/LookupWebProjectsCurrentCASAC/F228E5D4D848B.BED85258515006354D0/\\$File/EPA-CASAC-20-002+Response.pdf](https://yosemite.epa.gov/sab/sabproduct.nsf/LookupWebProjectsCurrentCASAC/F228E5D4D848B.BED85258515006354D0/$File/EPA-CASAC-20-002+Response.pdf). Administrator Wheeler's letter to the CASAC indicated the Agency will "incorporate the CASAC's comments and recommendations, to the extent possible, and create a final Ozone ISA so that it may be available to inform a proposed decision on any necessary revisions of the NAAQS by spring 2020." The consensus CASAC comments on the draft Ozone ISA (February 19, 2020) recommended that the Draft Ozone ISA would benefit from: (1) Critical review, synthesis, and discussion of available scientific evidence; (2) reassessment of causality determinations and rationale for some new and altered causality determinations; and (3) consultation with outside experts on high-level, overarching process aspects related to ISA development and consideration of causality. In consideration of these comments while preparing the Final Ozone ISA, the EPA added new text and clarified existing text in the Preface and in Appendix 10 to more clearly articulate how scientific evidence is identified, evaluated and summarized in the ISA, revised the causality determination for long-term ozone exposure and metabolic effects, and will take steps to both identify methods for improving the ISA process and to solicit outside expertise on best practices for making causality determinations from multiple lines of evidence. Additionally, the EPA focused on addressing those comments that contributed to improving clarity, could be addressed in the near-term, and identified errors in the draft Ozone ISA. Lastly, Administrator Wheeler noted, "for those comments and recommendations that are more substantial or cross-cutting and which cannot be fully addressed in this timeframe, [the Agency will] develop a plan to incorporate these changes into future Ozone ISAs as well as ISAs for other criteria pollutant reviews."
